Toolset to implement Smart Processes on a Blockchain

The background features a collage of business-related images. At the top, a hand holds a magnifying glass over a person icon. Below, a person in a suit is visible. In the foreground, a hand holds a document with a 'GLOBAL MAP' chart. The entire scene is overlaid with a green geometric pattern.

THE WORLD OF PROCESSES: CHALLENGES AND OPPORTUNITIES

- Streamlining processes between the huge number of market participants today, lead to the **“API Hell”** raising issues on
 - Versioning and Maintenance
 - Scalability
 - Redundancy and Security
- For the first time in IT evolution, the **Blockchain offers a common canvas** that we all trust to work with.
 - Distributed and Secure
 - Scalable
 - Programmable (Smart contracts)
- An opportunity to move **from Smart Contracts to Smart Processes** and automate today’s multi-participant processes.

“It’s clear that writing a robust, secure smart contract... is similar to writing code for a nuclear power reactor.....”

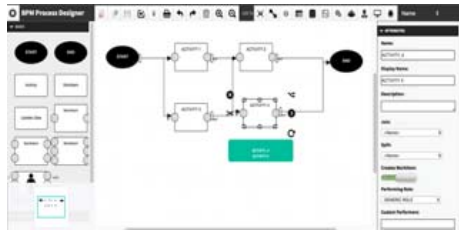

Emin Gun Sirer,

THE SOLVUS SOLUTION

An end-to-end orchestration platform to streamline processes between organizations

Drag-and-drop **Process Designer**

Simple and robust **Business Process Execution engine**

A **Smart Contract code generator**

End User interface

to participate in running processes

Process Analytics

Role mgmt and Security

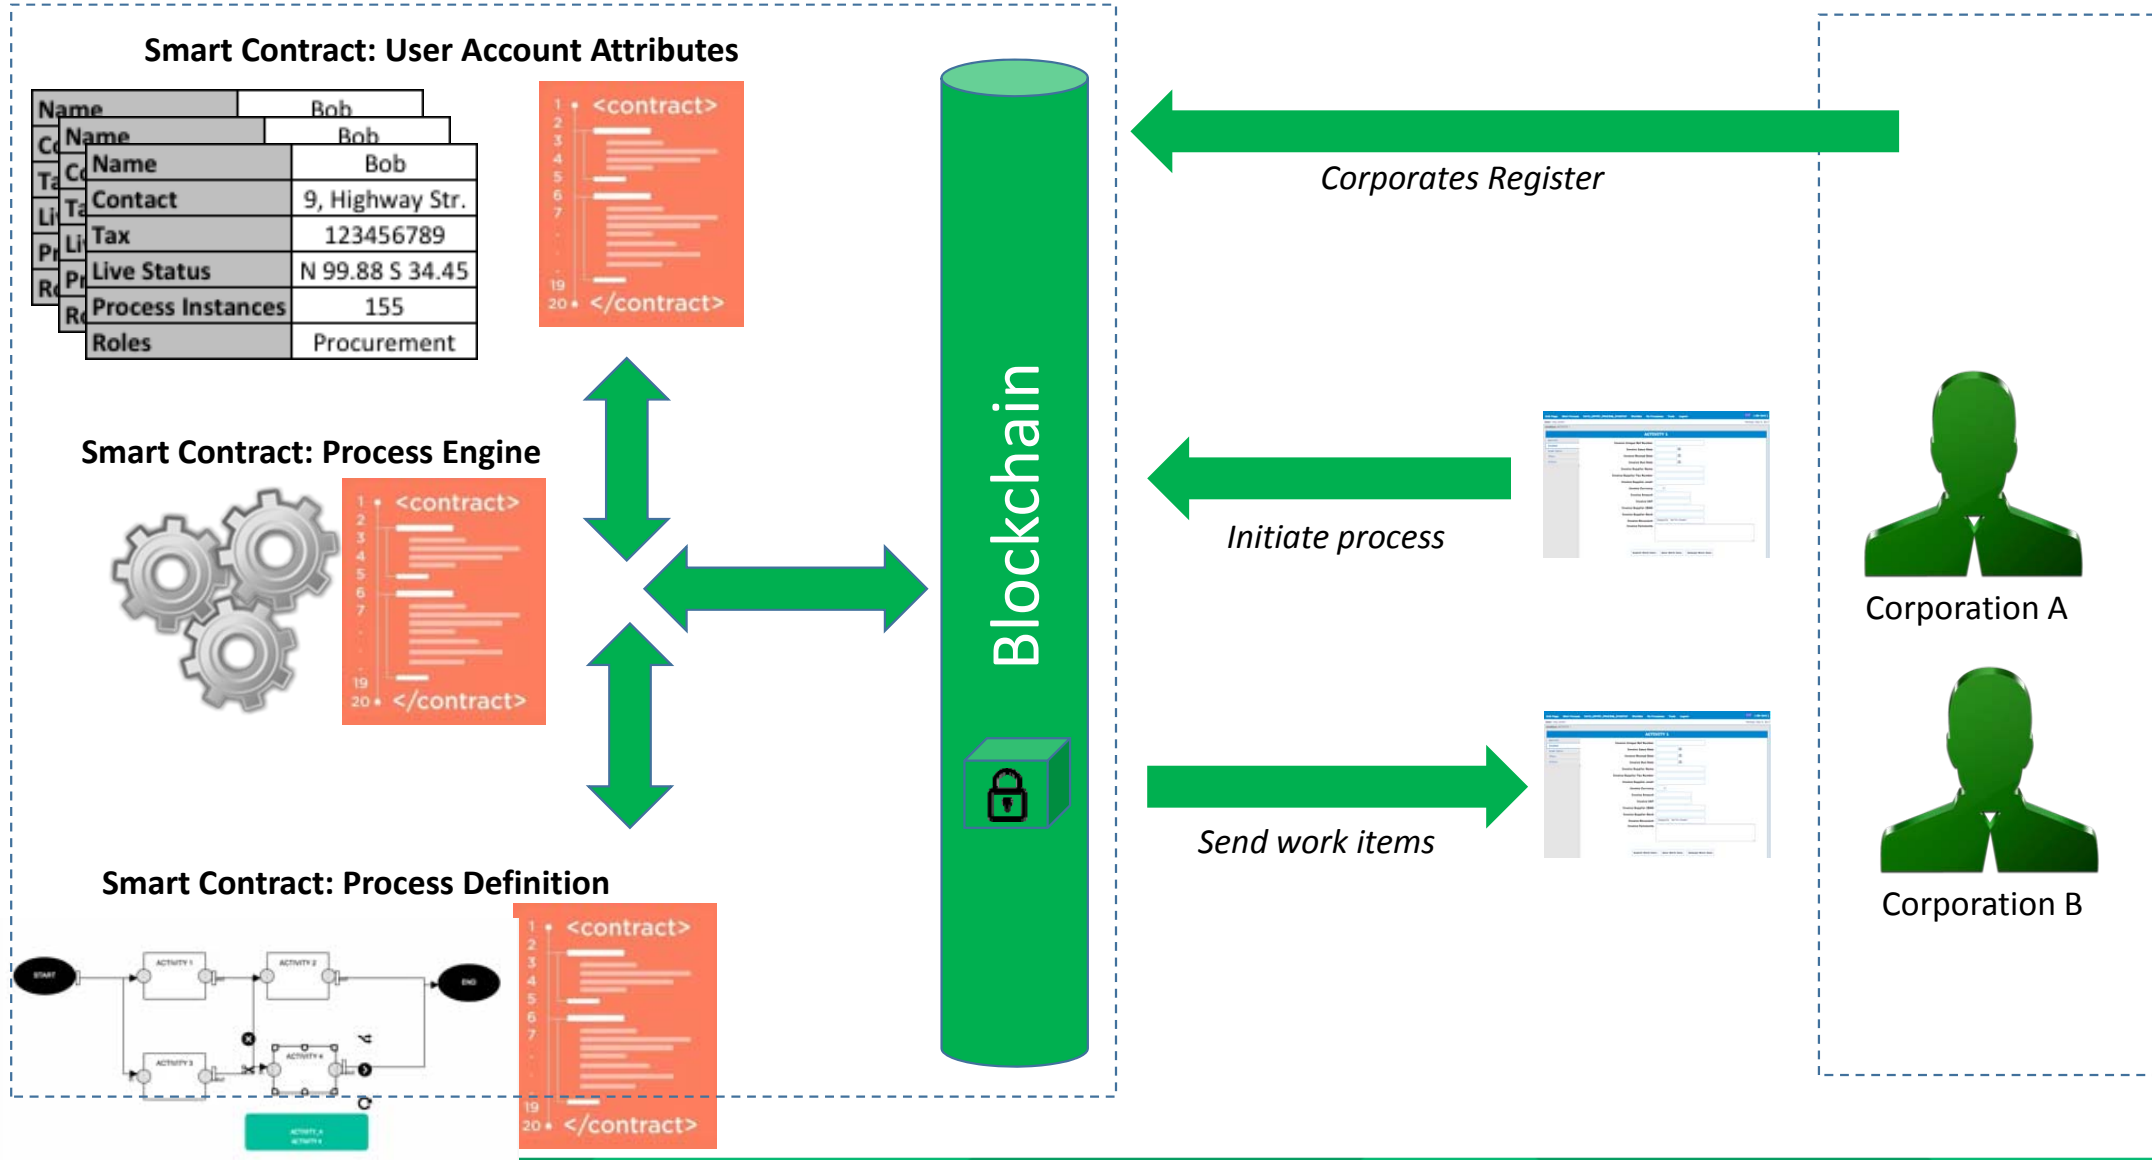

A **turn-key** solution based on proven **blockchain** technology.

SOLVUS PLATFORM: RELIABLE PROCESS AUTOMATION ON THE BLOCKCHAIN

FAST, RELIABLE, AND SECURE INTER-COMPANY PROCESSES

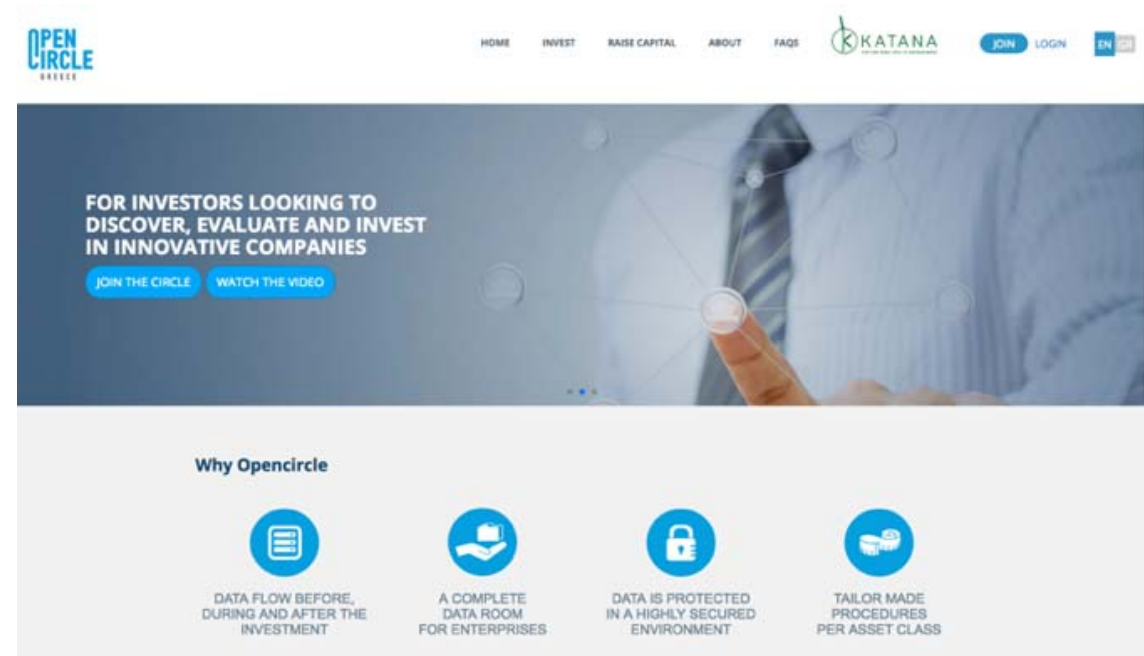

- Market-wide, **non-partisan protocol of processes**, removing burden of establishing independent inter-company solutions.
- One-time, market-wide participant **registration** and authentication, along with roles and competencies
- **Transparency, Tracking,** and **Reliability** for accurate process execution
- **Standardization** of best practice processes through the participation of **Consulting groups**
- **Process performance (KPIs)** visible to the entire “market”
- **Top level data security** based on blockchain technology

USE CASE: AUTOMATING THE CROWDFUNDING PROCESS – THE OPEN CIRCLE PROJECT

- **Automating the full set of the Crowdfunding**
 - Registration as Investor / Entrepreneur
 - Raise capital process
 - Crowdfunding and shareholding
 - Quarterly updates / Auditing
- **Successful completion of**
 - Raised 2m. additional capital
 - Katana project to server 27+ countries in Agricultural rewards processes
- **Under development**
 - Insurance claims
 - P2P Betting
 - Pay on Delivery

THE NEXT GENERATION OF DOING BUSINESS ACROSS ENTERPRISES

Blockchain based Smart Processes will enable a new, massive Business Process Management wave.

Business Process Mgmt is still rising:

- Market size at \$7 billion on 2016
- Projected to reach \$13.5 billion by 2021
- Growth rate at 14.2% (CAGR)
- SMEs will be leading the growth

Blockchain from trend to market standard:

- Market size \$10 billion by 2022
- Projected to reach \$20 billion by 2025
- Growth rate at 61.5% (CAGR)
- Heavy and growing capital investment
