## DEFEA 2023 in Numbers

## Defence Exhibition Athens

International Defence & Security Exhibition

6-8 May 2025  
METROPOLITAN EXPO

The new point of reference  
for the international defence  
and security industry

**DEFEA international defence and security exhibition** is the new milestone for the industry, with high-profile exhibitors presenting the latest technologies and cutting-edge defence systems in land, sea, air, national and cyber security systems.

DEFEA 2023 hosted 346 exhibitors from 28 countries highlighting its international character and Athens geostrategic position in the southeastern Mediterranean.

The third edition of **DEFEA - Defence Exhibition Athens** will be held from 6 to 8 of May 2025 at Metropolitan Expo, next to Athens International Airport.

**DEFEA** is organised under the auspices of the **Hellenic Ministry of National Defence**, with the cooperation of the **Hellenic Manufacturers of Defence Material Association (SEKPY)** and the support of Hellenic Aerospace Security & Defense Industries Group (HASDIG) by **ROTA Exhibitions Greece**.

## EDITORIAL

The Directorate of Defence Investments and Technological Research of GDDIA, has been entrusted with the task of updating the Hellenic Defence Industries Catalogue (HELDIC). The HELDIC 2025-26 edition follows the same standardized and structured format as in the three previous editions, to better reflect the capabilities of our defence industry, and provide specific company information such as activity, products, size, customers, certifications etc.

Each company's activity is indicated by selecting one or more out of 15 areas (Sectors of activity), while their capability and position in the value chain are also highlighted. The selection is made in accordance with detailed guidelines which are included in this catalogue. The companies are listed alphabetically and an index table has been incorporated which provides information about each entity's type of activity.

In HELDIC 2025-26, the number of listed companies has been increased as a result of the growing interest of the Greek defence industries for international cooperations and GDDIA's continuous efforts to promote the capabilities of the domestic defence industry in the foreign markets.

The catalogue is available in digital copy via QR Code format that will be provided to stakeholders through post cards. The digital copy via QR Code is accessible in the official GDDIA website ([www.gdaee.mil.gr](http://www.gdaee.mil.gr)).

This catalogue is representative of the Hellenic Defence industry, even if it does not include all the companies having defence activity in Greece. Although the participation in the catalogue is optional, certain eligibility criteria, related to defence sector particularities and sensitivities, apply.

The establishment of the criteria and the final selection of the companies included in the HELDIC 2021, were finalized in collaboration with the associations HASDIG and SEKPY, which are featured in this edition.

We have done our outmost to guarantee the accuracy of the information contained herein, however it should be noted that the information was mainly based on data submitted by the companies under their responsibility.

## INTRODUCTION

It is with great pride that we introduce the 2025-2026 edition of the Hellenic Defence Industries Catalogue HELDIC, a comprehensive resource showcasing Greece's robust and innovative defence industry. This catalogue is designed to serve as an authoritative guide for international partners, industry professionals, and stakeholders, offering a detailed overview of the capabilities, products, and services provided by Greek companies across the defence and security sectors.

Greece has a rich history and tradition in defence, marked by strategic resilience, advanced engineering, and innovation. Our industry encompasses a diverse range of expertise, including land, air, and naval systems, cyber and electronic warfare, and research and development in cutting-edge technologies.

Today, the Hellenic Defence Industry is consisted mostly by small-medium enterprises thriving to gain high level capabilities and unique technological expertise by cooperating with international key players and being part of their supply chain. Over the last five years following a series of actions undertaken by the Ministry of National Defence, the domestic defence industry achieved a significantly high level of participation in European and NATO research and development programs, paving the way for a promising future in the technological edge of the European Defence Industry.

This catalogue reflects our commitment to transparency, collaboration, and excellence. We aim to foster global partnerships and encourage investment, innovation, and knowledge exchange that will enhance both our national defence capabilities and collective security. Each entry within these pages represents our dedication to upholding the highest standards in defence and our readiness to contribute effectively to allied and multinational efforts worldwide.

We invite you to explore the Hellenic Ministry of Defence Industry Catalogue and discover the innovative solutions and strategic partnerships that Greece brings to the global defence landscape. Together, let us forge a future of stability, security, and shared success.

Major General Ioannis Bouras  
General Director GDDIA

## Hellenic Aerospace Security & Defense Industries Group

[www.hasdig.com.gr](http://www.hasdig.com.gr)

### HASDIG

Hellenic Aerospace Security &  
Defense Industries Group

We are pleased to welcome the effort of the General Directorate for Defence Investments and Armaments (GDDIA) of the Hellenic Ministry of National Defence, to exhibit the Hellenic Defence Industry's capabilities in the fields of Aerospace, Defence and Security through the publication of the HELDIC catalogue.

Hellenic Aerospace Security & Defence Industries Group (HASDIG) is a non-profit organization, which represents the Hellenic Defence industry by actively supporting the competitive development of the sector as well as promoting and advocating the interests of its member companies to Governmental National, European, and international authorities.

Since its establishment, HASDIG has been a reference point for Governmental institutional organizations in order to define common industry positions while providing its inputs to National and EU policymaker key stakeholders.

HASDIG is a member and national representative of the Aerospace and Defence Industries Association of Europe (ASD). As a member of ASD, HASDIG has the privilege of representing the Aerospace and Defence Industries to the European Defence Agency (EDA) as well as other institutions and bodies with pan-European reach and action.

HASDIG consists of 55 state and privately-owned companies all of them with the majority of their industry activities in defence, employing several thousand personnel, with a further large number of domestic suppliers. HASDIG and its members support the need for a competitive and indigenous Defence Industry to guarantee the security of supply while maintaining a certain degree of strategic autonomy for critical technologies.

Our member-companies possess significant industrial and technological know-how, highly skilled and trained engineers and personnel, including modern infrastructure. Their long-term experience has helped to build an impressive and highly valuable synergy culture, that allows them to work effectively with international companies and OEM's on various Defence projects.

Furthermore, our member-companies are active participants and collaborate with other industry partners and research institutions in domestic and EU Research and Development (R&D) programs (PADR and EDF), in support of future cutting edge innovative technologies for new capabilities in Defence systems and services.

HASDIG's strategic planning includes the development and expansion of Hellenic Defence Industry to a dynamic and export-oriented sector offering innovative and competitive products and services for the benefit of both the domestic industrialization and the national economy.

Dimitrios Skalaaios  
**Chairman of the Board of Directors**  
Hellenic Aerospace Security & Defence Industries Group (HASDIG)

**SEKPY**  
HELLENIC  
MANUFACTURERS  
OF DEFENCE  
MATERIEL  
ASSOCIATION

**SEKPY**

HELLENIC MANUFACTURERS OF  
DEFENCE MATERIAL ASSOCIATION

**“A strong Greek Defence Industry means Strong  
Hellenic Armed Forces which means a Strong Greece.”**

SEKPY, the Hellenic Manufacturers of Defence Materiel Association, was founded in March 1982. To date, this non-profit Association counts more than 220 Greek Defence and Security companies directly employing 15,000 people.

At SEKPY, we are dedicated to advancing the interests of our members in both domestic and international markets. Our mission encompasses advising Hellenic Authorities on Defence Industrial and Research & Technology Policy, ensuring that our industry remains responsive to emerging challenges and opportunities.

To that end, SEKPY actively monitors both domestic and international developments, conducting specialized studies to facilitate the growth of the Hellenic Defence Industry. We play a pivotal role in shaping policies related to procurement, industrial participation, and research and development, representing our members at various national and international forums to promote their capabilities and offerings.

Our Members' activities cover a vast range of Industrial, Defence and Security products and services including: Aerospace and Repairs, Ammunition & Explosives, Arms & Weapon Systems, Metal works and Precision Machining, Communication, Electronic, Electro-optic Equipment & C4I Systems, Shipbuilding & Ship-Repairing, Military & Armor Vehicles, Spare parts, Repair & Upgrade Services for Defence Systems, NBC Protection, Uniforms, Accessories etc., Software Development for Military Applications, Simulation and Training, Energy Systems, Physical Security, Mobile Field Hospitals, Field Kitchens, Field Bakeries etc.

The Association's strong network and enduring partnerships empower our members to engage in collaborative projects and access major European funding initiatives. Through our dedicated EU Funded Programs Office, we facilitate participation in the European Defence Fund (EDF) and HORIZON EU proposals, bridging connections within the Hellenic Defence and Security landscape.

In addition, we are proud to co-organize DEFEA - Defence Exhibition Athens along with the DEFEA Conference, key events which take place successively for showcasing our industry's advancements. We warmly invite you to join us at DEFEA 2025, taking place from May 6-8, 2025.

Additionally, we proudly hold membership in both AeroSpace and Defence Industries Association of Europe (ASD) and European Network for Rural Development (ENRD) organizations, while our involvement extends to the organization of the Greek Pavilions at both EUROSATORY & EURONAVAL defence trade exhibitions.

Taking a leap of excellence, SEKPY joined forces with Educational Institutions and Research Centers of the country's highest educational scale, a collaboration that led to the establishment of the “Defence Industry, Higher Education and Research Interconnection Company” with the distinctive title “**DefencEduNet**”, which is the first DEFENCE CLUSTER. The fundamental purpose of the Cluster is to create a hub for connecting domestic companies active in the Defence Industry with the Academic Community.

Taking all the above into account, this catalogue is more than just a collection of brands and trademarks; it embodies the innovative spirit and collaborative ethos of our member companies. With their specialized expertise and commitment to quality, SEKPY members are well-prepared to provide a wide array of effective and cost-efficient solutions to meet the needs of the defence sector.

We encourage you to explore the opportunities within this catalogue and look forward to fostering fruitful collaborations in the future.

Anastasios Rozolis  
President of SEKPY

## **E.E.N**

### **HELLENIC SHIPYARDS ASSOCIATION (HSA)**

With great honor and a deep sense of responsibility, I welcome you to the 2025-2026 edition of the Hellenic Defence Industries Catalogue (HELDIC) – the most comprehensive source of information on the strength, innovation, and prospects of the Greek defence industry.

The Greek defence industry stands at a pivotal moment. Investments, technological advancements, and strategic partnerships – both domestic and international – have fostered an environment conducive to the development of high-quality, integrated defence products. From shipbuilding capabilities, such as frigates, to collaborations with leading global weapons systems manufacturers, Greece is proving its ability to compete on the international defence stage.

Our shipyards exemplify innovation and competitiveness. Greece's shipbuilding sector, spanning both commercial and defence vessels, now rivals that of other European nations – delivering excellence at a cost 10-15% lower. This is a significant achievement, underscoring our ability to thrive in the global market.

As President of the Hellenic Shipyards Association, I am in constant dialogue with the government to address the challenge of unfair competition within Europe. It is imperative to implement measures that ensure fair competition and enhance the long-term viability of our industry. Greek shipyards must move beyond playing a minor role in the supply chain; they must manufacture complete, integrated products that can stand strong in the international arena.

Our strategic priorities include establishing a regulatory framework that enables vertical production, fostering synergies with other domestic defence industries, and implementing an evaluation system for arms programs. Additionally, we have invested hundreds of millions of euros in upgrading infrastructure, securing jobs, and revitalizing local economies.

HELDIC is more than just a catalogue – it is a testament to our collective commitment to a strong, independent, and competitive defence industry. We welcome international partners to collaborate with us, recognizing the value of Greek capabilities and expertise.

With this spirit, I hope that this year's edition of HELDIC serves as a benchmark for all who share our vision of a strong and resilient Greece in the field of defence.

Panos Xenokostas,  
President of the Hellenic Shipyards Association  
President & CEO of ONEX Shipyards & Technologies Group

# SECTORS OF ACTIVITY

1. **Aerospace, Avionics & Related Systems**
  - Production of integrated air platforms (excluding unmanned vehicles) and space platforms.
  - Production of integrated systems, ready to be incorporated in the aforementioned platforms, i.e. aircraft engines, avionics and specialized Ground Support Equipment (GSE) for their support.
  - Manufacturing of major structural elements for the platforms of the sector.
  - Certification to provide Maintenance, Repair and Overhaul (MRO) services for platforms and/or systems of the sector.
2. **Ground Vehicles, Vetrronics & Related Systems**
  - Production of integrated ground vehicles (excluding unmanned vehicles).
  - Production of integrated systems, ready to be incorporated in the aforementioned vehicles, i.e. engines, vetrronics and specialized Ground Support Equipment (GSE) for their support.
  - Manufacturing of major structural elements for the vehicles of the sector.
  - Certification to provide Maintenance, Repair and Overhaul (MRO) services for vehicles and/or systems of the sector.
3. **Naval Platforms & Related Systems**
  - Production of integrated naval platforms, surface and underwater (excluding unmanned vehicles).
  - Production of integrated systems, ready to be incorporated in the aforementioned platforms, i.e. marine engines and electronic systems, or for autonomous use in marine environment and specialized Ground Support Equipment (GSE) for their support.
  - Manufacturing of major structural elements for the platforms of the sector.
  - Certification to provide Maintenance, Repair, Overhaul (MRO) services for platforms and/or systems of the sector.
4. **Armament, Ammunition, Explosives & Related Systems**
  - Production of integrated systems of arms, ammunition and explosives.
  - Production of missile technology engines and specialized Ground Support Equipment (GSE) for their support.
  - Certification to provide Maintenance, Repair, Overhaul (MRO) services and/or demilitarization for the systems of the sector.

5. **Electronics, Communication & IT Systems/Services, Cyber Defence, AI/Machine Learning**
  - Production of integrated electronic, telecommunication & information systems (C4ISR).
  - Certification to provide Maintenance, Repair, Overhaul (MRO) services for the systems of the sector.
  - Production of information systems with the assistance of Artificial Intelligence and Machine Learning.
6. **Unmanned Systems**
  - Production of unmanned vehicles of all types excluding space platforms.
  - Production of Guidance, Navigation and Propulsion/Control specialized systems, ready to be incorporated in platforms of the sector, including the ground station as well as specialized Ground Support Equipment (GSE) for their support.
  - Certification to provide Maintenance, Repair, Overhaul (MRO) services for the platforms and/or systems of the sector.
7. **CBRN Protection & Personal Gear**
  - Production of CBRN protection systems, anti-ballistic shield and similar materials.
  - Production of personal equipment excluding arms and electro optical sensors.
8. **EO (ElectroOptical) & RF (RadioFrequency) Sensors**
  - Production of integrated EO & RF sensor systems including soldier-borne equipment.
  - Manufacturing of similar critical sub-systems, i.e. EO & RF sensor elements and development of sensor processing algorithms.
9. **Machinery, Composite Materials, Mechanical Components, Materials & Structures**
  - Production of special materials and manufacturing of structural parts and elements.
  - All kinds of materials special processing.
  - The production is intended for high-tech manufacturers or concerns authorized construction of spare parts.
10. **Electronic Components, Assemblies & Harnesses**
  - Production of electronic components, assemblies and harnesses.
  - The production is intended for high-tech manufacturers or concerns authorized construction of spare parts.
11. **Energy & Power Systems**
  - Production of integrated systems of generation, storage and distribution of energy and similar elements to be incorporated in these systems.
12. **Engineering, Modeling and Simulation, Consulting, Training**
  - Provision of complete technical studies and customized technical solutions, including modeling and simulation services and related techno-economic feasibility studies.
  - Certification to provide training related to defence systems support and provision of services.
13. **Field Infrastructure, Logistics**
  - Provision of field infrastructure, logistics and services in the area of operations.
14. **Labs & Calibration**
  - Accredited ability to perform analysis/testing/calibration.

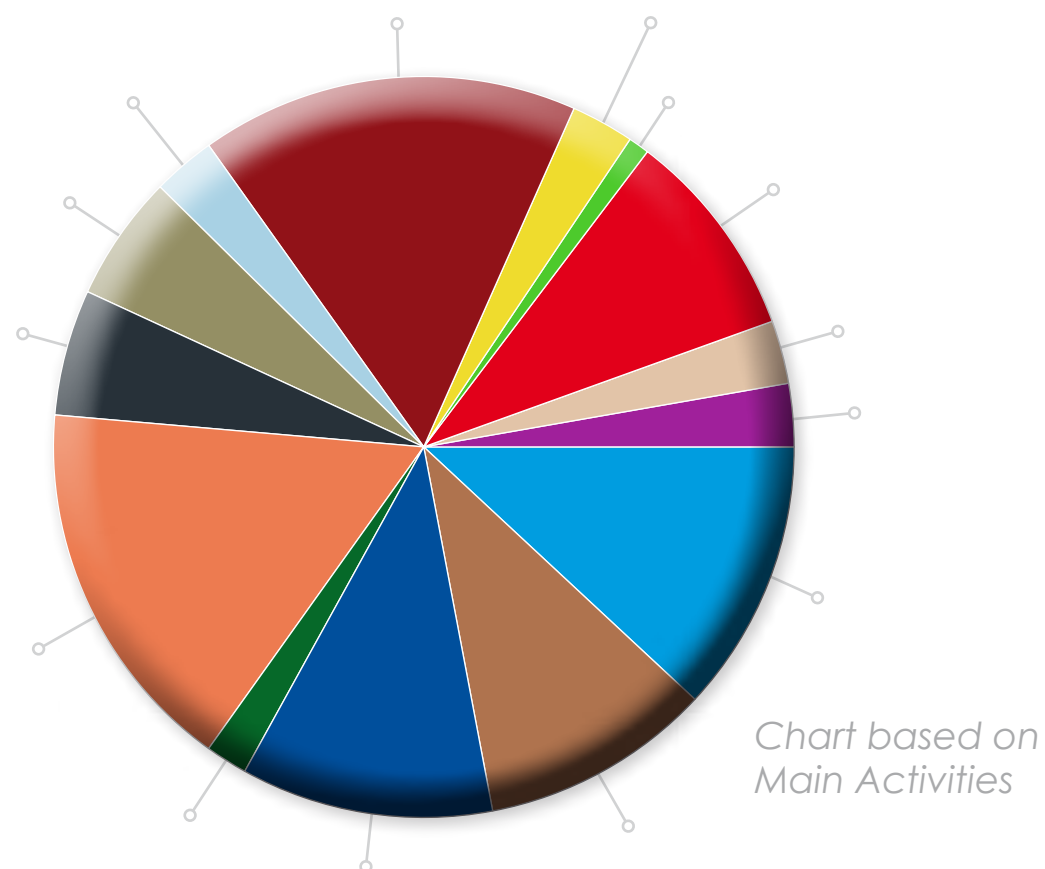

## CAPABILITY

1. **Research & Technology**
  - Systematic, evidence-based Research & Technology activity, aimed at discovering technological and innovative solutions, for their integration in the development of new products and services. TRL ranges from basic research to the validation and verification of the technology in a laboratory environment (TRL from 1 to 4).
2. **Conception/Development**
  - Ability to develop new products or services, using available technologies or innovative ideas. TRL ranges from the validation and verification of the technology in a laboratory environment to the construction of a complete and certified system (TRL from 4 to 8).
  - Includes Software development.
3. **Manufacturing**
  - Production of products or systems, on a large scale, using machinery. Transformation of raw materials into finished goods, or final products. Finished goods may be sold to other manufacturers for the production of other, more complex products.
4. **Assembly/Integration/Validation**
  - Capability of assembly and integration of different components or sub-systems (engineering or IT) into one complete and validated product, service or system, ensuring that it meets standard specifications for which it has been designed.
5. **Test & Evaluation**
  - Capability to test and evaluate a product both at the component level and at the level of an autonomous or integrated system, at all stages of its development in a valid and accredited manner.
  - Accredited testing and measurement laboratories.
6. **Support & Services**
  - Support and services in the product lifecycle, from design to withdrawal.

## LEVEL

1. **Integrated platforms**
  - Manufacturing of integrated weapons systems and in general integrated systems of defence: airborne, ground, naval, air defence and C4ISR.
2. **Subsystems or equipment**
  - Subsystems of the integrated weapon systems listed in level 1, equipment for their support and individual soldier-borne equipment.
3. **Components**
  - Specialized components and assemblies for the integration of the above systems, subsystems and equipment. Consumables (i.e. ammunition) and processing of raw materials are included.
4. **Services**
  - Support and maintenance of all the above systems, subsystems and equipment.
  - Logistics, transportation and infrastructure services in the area of operations.

## PROFILE

3DHUB is an Industry 4.0 market leader in Greece, focusing on the fields of additive manufacturing and digitalization processes. It operates the largest 3D printing/3D scanning lab in the Balkans, with facilities spanning over 1000sqm. 3DHUB covers all verticals and market segments with all available technologies, including metal PBF, nylon powder MJF & SLS, FDM polymers and SLA resins. 3DHUB is also direct distributor of selected AM brands and consumables and is actively involved in local and EU-funded R&D projects.

3DHUB has been officially recognized as the best Industry 4.0 company in Greece by the Elevate Greece national awards. It is a member of the Elevate Greece national startup database, Made in Europe Partnership, and European Technology Platform in Additive Manufacturing. Furthermore, 3DHUB is a shareholder in the i4bydesign Industry 4.0 Competence Center.

3DHUB also has strong links and connections to local Universities, Academia, Research institutes and the public sector where it frequently assists these organizations by undertaking public procurement tenders related to additive manufacturing.

3DHUB has close connections to the local ecosystem and to all the major present and future key players in the additive manufacturing sector in Greece.

## ACTIVITIES & PRODUCTS

3DHUB specializes in 3D printing, 3D scanning and 3D Designing.

The products and services offered by 3DHUB are:

- Selected 3D printing hardware
- 3D printing services - Biggest 3D Print Service Bureau in Greece/Cyprus
- Selected 3D scanning hardware
- High Resolution 3D scanning services
- 3D printing materials (filaments as well resins, binders and powders)
- 3D Design services

We are famous for our Technical support and Training services as we are heavy users of our equipment in a very demanding environment.

3DHUB is also involved in numerous R&D projects (regional and EU funded)

## PROFILE

Adamant Composites develops cutting-edge solutions for Aerospace, Defence, and Energy. We are a privately held industrial SME, working on the full product development cycle covering activities from specifications, to engineering, to process development, to manufacturing, assembly, integration and testing.

Through our Business Units (Engineering Systems, Advanced Materials and Composites), our core expertise in design of complex mechanical systems, engineering and manufacturing of composite and nano-enabled materials enables applications such as satellite structures, batteries, storage tanks, UAV airframes, deployable structure subsystems, structural components for satellites and launchers, as well as ground support equipment.

Selected by large Industries and SMEs, Adamant Composites has delivered critical components and equipment to multi-national missions. Next to the products and services, the company is strongly involved in R&D activities, having been entrusted to lead and contribute to institutional (European Commission, European Defence Agency, European Space Agency, European Defence Fund) and commercial R&D investing in developing and bringing new technologies to the market.

## ACTIVITIES & PRODUCTS

### PRODUCTS:

- Autoclave Composite parts, CFRP Sandwich Panels and Struts
- Satellite Solar Arrays
- Secondary and bespoke composite parts (covers, electronic boxes, brackets,...)
- Nano-enabled prepreg for improved CFRP structures (FXply™) Graphene & Nano-Enabled Adhesives (FXbond™)
- Deployable Structures:  
Lightweight Stable Truss, Reflector Antenna, PNT Antenna
- Mechanical Ground Support Equipment for Satellites:  
Multipurpose trolleys & Stands, Launcher Adapters, Lifting & Handling Devices.
- Satellite and Payload Structural Models
- Type V CFRP tanks for small launchers

### ACTIVITIES - SERVICES:

- BU Engineering Systems:
  - Advanced Product Engineering CAD/CAE
  - Mechanical Engineering and verification testing support of Bespoke Complex Structures
- BU Advanced Materials:
  - Development of Nano-enabled materials
  - Development & Piloting of new materials technologies
- BU Composites:
  - Autoclave composite and parts and sandwich panels- Built-to-Print & Built-to-Spec
  - CFRP parts prototyping and small series production

## PROFILE

Aero Apartition is a trade and consulting company based next to Athens International Airport.

It is a customer focused supplier of aviation products and services, supporting them through ISO 9001:2015 procedures and practices, aiming to continually meet their expectations.

We collaborate closely with the Armed Forces, commercial operators from Greece and abroad, brokers and repair stations.

Our vision is to be the first thought of choice for any possible request.

## ACTIVITIES & PRODUCTS

Aero Apartition collaborates with all the major suppliers of aviation spare parts and equipment and is capable to support the Hellenic Armed forces covering any need, anytime.

In collaboration with Jet Aviation Defence, Aero Apartition supports the sustainment / follow-on support for military aircraft fleets, the turnkey delivery of new platforms and the modification of special mission aircrafts.

Representing Repair Centers of different maintenance capabilities, Aero Apartition provides the following services:

- Engine Repairs (Bet Shemesh Engines, Patria BEC)
- Component Repairs (Patria, Antavia)
- Composite Repairs (Hutchinson - Composite Industrie)

Finally, promoting Air Group America / AAPCO in Greece, Aero Apartition offers the development of FAA PMA parts and facilitates the development of DER Repairs.

Providing repair management services to HAF and NSPA, already, we aim to introduce similar agreements with all the Armed Forces.

## PROFILE

AeroPhoto Co Ltd is an Aerial Survey and Geospatial Data Processing company with expertise in Acquisition, Analysis, Mapping and Delivery of Geospatial Information.

It is committed to airborne spatial data acquisition of the earth's surface and its advanced processing, leading to value-added geoinformation products e.g. DTM, DSM, 3D Models, and Orthophotomaps.

With our long experience and reliability, we provide accurate topographic and geospatial raw data and derivatives, such as aerial photography, LiDAR 3d models and Digital Twins using SOTA technologies, cameras and sensors. The company successfully operates missions in EU and EMEA countries.

Customer-focused and committed to innovation, our services are constantly evolving to meet the needs of a broad range of market sectors e.g. Forestry, Land Administration, Transportation and Infrastructure, Archaeology, Natural disaster management,

and Corridor Mapping such as Pipelines, Railway and Powerlines.

In collaboration with Private and Public sector, Universities, Research & Innovation Institutes, and Technological Centers, we participate in research programs whose prerequisite is ultra-high resolution multispectral Aerial Imagery, LiDAR datasets and Geospatial expertise.

## ACTIVITIES & PRODUCTS

AeroPhoto Co Ltd undertakes aerial photography, LiDAR, thermal and hyperspectral survey missions operating the most up to date aerial sensors, aircrafts and UAVs.

Flight missions for the acquisition of ultra-high-resolution aerial Ortho and Oblique imagery and LiDAR data, are carried out by specially modified aircrafts.

Our aircrafts are equipped with airborne mapping systems, digital large and medium format aerial cameras (e.g. Vexcel Ultracam Eagle M3, Phase One iXU-RS 1000), LiDAR sensors (e.g. Riegl LMS VQ-1560ii-S, VQ-880-GII), hyperspectral and thermal cameras (e.g. CASI & TABI), accurate GPS/IMU systems and other scientific and calibration equipment and sensors.

Our sensors allow us to execute capture with a GSD range of 1.5 to 50cm. Flight planning is achieved by a specialized industry standard 3D flight planning software.

Depending on the client's requirements, type of services offered and export formats, we use a wide range of photogrammetric post-processing and LiDAR point cloud software tools enhanced with AI and Deep Learning algorithms, ensuring the compatibility of outputs with the most CAD and GIS platforms.

## PROFILE

AEROSERVICES S.A. since 1993 supports civilian, security and military organizations in Greece and Europe offering one stop shop aviation services to aircraft owners and operators.

In our facilities at Megara and Athens International Airports we offer to our customers from daily checks and scheduled maintenance operations to aircraft up to complete overhaul of components including engines, avionics, electrical and mechanical systems.

Our objectives towards quality and safety strive against from our commitment for customer satisfaction, continually seeking opportunities for improving our services and activities.

## ACTIVITIES & PRODUCTS

AEROSERVICES S.A. is a leading company in Greece in Business, General, Security and Defence Aviation in Greece.

In state-of-the-art facilities we offer to our customers totalized support programs in a big range of activities:

- Distribution of Aviation platforms, engines, components.
- Airplane and helicopters Maintenance, modifications.
- Engines Maintenance (Inspections, Repairs, Overhaul).
- Avionics and electronics Inspection Repair, Modifications.
- Aviation Platforms Modifications, Upgrades, Integration.
- Continuing Airworthiness Services to Civil and Defence Aviation Platforms (CAMO).
- Aviation Training (Pilots and Technicians). GR ATO 117
- English Proficiency Examination Center.

## PROFILE

Aether Aeronautics is a Greek company founded in Chania Crete in 2020.

Within the framework of its activities, Aether Aeronautics is active in the following sectors:

- Research and design of aerial targets, surface targets, unmanned aerial vehicles and light aircrafts.
- Manufacturing of aerial and surface targets, unmanned aerial vehicles and light aircrafts.
- Manned and unmanned flight tests.
- Provision of services with manned and unmanned aircrafts.
- Maintenance and repair services for manned and unmanned aircrafts.
- Technical consulting services.

The creation of the company was based on the long experience of its executive members on the design and manufacturing of unmanned aircrafts and aerial targets. Since its establishment AETHER has become a reputable and well-known defence manufacturer across the globe.

Aether Aeronautics holds a complete Operations Team that is able to provide Target Drone missions, land or maritime, at any part of the world, under any given environment or condition. The company's aim is to deliver next generation technology to clients globally, with local participation at the core of our operations, providing affordable solutions with advanced and cost-effective technologies, competitive in the international market. Flexibility, customization of products and provision of turnkey services according to each End User requirements are some of the vital assets of the company. The company manages an established and carefully architected production line of all target drone products, under the most modern and demanding standards.

Aether Aeronautics is continuously expanding its global reach across all continents, addressing ever-changing tactical requirements with high-performance and reliable mission-ready solutions.

## ACTIVITIES & PRODUCTS

The company has designed more than 15 different Target Drone models and model families, covering all the range of performances from low-speed to transonic.

AETHER AERONAUTICS provides complete flight-testing schedules including:

- Research and design of light aircraft, unmanned aerial vehicles and aerial targets
- Manufacturing of molds and prototypes
- Launching and sub system construction
- Test & Certification
- Production line
- Fitting of parts
- Electronics assembling
- Final Composition
- Testing - Analysis
- Optimum configuration
- Flight services
- Maintenance and repair services
- Provision of services with manned and unmanned aircrafts
- Technical consulting services

## PROFILE

AKMON S.A is a wholly owned Greek corporation that specializes in Defence & Aerospace Electronics and also acts as a technical advisor to both foreign and domestic companies active in the promotion and sale of products and services to the Hellenic Armed Forces.

AKMON was established in 1988 and operates from its own manufacturing facility located in the Industrial Park of Ano Liosia, west of Athens, with a staff composed of high-quality mechanical, electrical electronic engineers, skilled technicians and financial specialists.

The company is registered in "The Registry of Defence Materiel Manufacturers of the Hellenic MoD" Certificate Number: 0020.06. Acting to its capacity as a technical advisor, AKMON is a valuable source of information related to the market environment, providing reliable up-to-date consultancy services.

## ACTIVITIES & PRODUCTS

AKMON's portfolio of activities ranges from manufacturing, upgrading and rebuilding cable sets and harnesses for aerospace use, electro-mechanical assemblies, consoles and cabinets to assembling high technology telecommunications and electronic equipment for air, sea and land Defence Applications in accordance with the Highest Mil-Aero Standards.

AKMON has successfully fulfilled for the Hellenic Army a contract for the Supply, Installation and Maintenance of a MOBILE HOSPITAL that was used during their operational mission in Kabul-Afghanistan as well as contracts for the Supply of Four (4) MOBILE BAKERIES and Two (2) 20Tn PLATFORMS for Army Tractors.

### R&D ACTIVITIES:

AKMON's R&D Department focuses in the following sectors:

- Software & Hardware Development: designs and develops high quality defence subsystems tailored to the requirements of customers or projects.
- Automated Test Equipment (ATE): AKMON's R&D design and develops ATE for Defence Electronics, which optimizes the manufacturing productivity of military electronics components and electrical harnesses.
- Computer Vision Technologies for production process automation - Quality Control (QC) & Assurance (QA)

## PROFILE

The company D. MANOLIS & SIA EE, (d.t. ALFASOLID), was founded in 2006 and is the Official Reseller of SOLIDWORKS® and 3DEXPERIENCE® from the company Dassault Systèmes SE in Greece and Cyprus, as well as the official reseller for other specific software, such as SOLIDCAM, SWOOD, LANTEK and others. ALFASOLID mainly operates in the field of reselling specialized software, as well as providing services and training.

ALFASOLID's goal is to support the research field by offering the appropriate tools and necessary knowledge to all Research centers, to Universities and Schools in the country, so that to achieve new milestones. Moreover, ALFASOLID's goal for the industry is to provide specialized software for the completion of workflows, as well as to transfer the know-how aimed at solving problems and digitizing the industry, including aerospace and defence.

## ACTIVITIES & PRODUCTS

Our core products include the 3D design (3D CAD) software SOLIDWORKS, for the creation of models and drawings of mechanical components and assemblies, the 3DEXPERIENCE platform that enables real-time collaboration, and the CAM software, SolidCAM, used for the programming and automation of machining processes on CNC machines.

ALFASOLID resells specialized CAD/CAM software, such as Lantek, for metal processing, SWOOD for furniture and woodworking products, Cimatron, which supports the production process from design to manufacturing and CNC machine programming and DriveWorks, among others.

ALFASOLID provides Consulting Services such as the development of specialized software from their installation to employee training, identifying and developing applications to create customized solutions for addressing issues arisen and solving problems.

Additionally, it offers technical support and training for the software it provides and organizes training seminars and webinars to improve the understanding and the use of the tools.

## PROFILE

ALTUS LSA is an innovative technology company which since 2011 provides turnkey solutions and - state of the art - services in the field of Unmanned Systems.

Our company's experience and know-how extends to various areas such as land and sea border surveillance, intelligence gathering, airborne ISR, natural disaster management, GIS applications, control and protection of critical infrastructure, RGB / thermal / multispectral mapping, target drone applications training / shooting / evaluation of anti-aircraft systems etc.

## ACTIVITIES & PRODUCTS

ALTUS LSA has been active in the sectors of Defence and Public Security, offering services to a variety of major customer both regionally and internationally.

The company has developed a portfolio of Multicopters and Fixed Wing Systems that can be customized according to the customer and operational needs per use case or application.

Additionally, ALTUS LSA develops its own C2/3 Mission Management System based on proprietary inhouse software development.

Finally, the Company offers Training Services issuing Pilot Licenses for a broad range of UAS/UAV types.

## PROFILE

Aerospace Management and Support PCC (AMS AERO) is established in Athens-Greece with the mission to assure the operational capability of Civil and Military aircraft and helicopters, providing a wide range of solutions on Avionics, Maintenance Repair and Overhaul (MRO) and Maintenance Training Services (MTO).

AMS AERO is targeting on delivering innovative and cost-efficient solutions to customers worldwide by:

- Reducing maintenance costs,
- Increasing aircraft availability,
- Minimizing inventories & optimizing supply chain management,
- Ensuring regulatory compliance,
- Implementing the newest technologies for maintenance operations

## ACTIVITIES & PRODUCTS

- Maintenance, Repair and Overhaul (MRO)
- AOG Support Service 24/7, 365 Days per year
- Aviation Parts & Rotables:
  - Honeywell (Channel partners - Avionics and Mechanical (Engines & APU) authorized service center), Collins Aerospace (Avionics - Dealers and authorized repair center), Garmin - Avionics (Avionics - Dealers and authorized repair center), Bendix King (Avionics - Dealers and authorized repair center), Kannad/Orolia (Avionics - Dealers and authorized repair center), ACR / ARTEX (Avionics - Dealers and authorized repair center), BOSE, David & Clark.
- Engineering Services / Certification, STCs.
- Avionics Installation/Upgrades.
- Interior Refurbishment.
- Consultancy Services Support to Defence Contracts negotiations: Support to Offset programs Participation to MoD Tenders.
- Training Services:
  - Full B1 and B2, EASA Part 147 approved Theoretical and Practical training courses. Type Specific Initial Maintenance courses for business aircrafts.
  - Aviation Regulatory Training courses.

## PROFILE

ANORAK is an entirely Greek company, and its name is synonymous with waterproofness for over 40 years now.

Today, in the hands of the second generation of the family that created it, ANORAK is developing dynamically, on the basis of solid values and high standards.

Our production line was, is and will be Greek, since corporate growth may only occur as long as Greece and the EU develop.

The creation of innovative products and technologies is the steadiest course towards sustainable development.

Our ballistic vests business encompasses our vision and our corporate values. Armed with our know-how in waterproof and windproof products, we are currently producing garments for the everyday protection against weather conditions, and special collections for the sea, for hunting and motorcycling.

The quality of our products, along with sound environmental management, constitute our priorities throughout all production stages, and we make sure that we obtain the relevant certificates following all reliable processes.

At a time that development constitutes a challenge, both at personal and national level, we have mustered our capabilities and potential, focusing on a big new goal.

We have created a new Greek production line of personal protective equipment based on the highest international standards. Addressing the Greek and international markets, we now have a new vision that gives us power and optimism for the future.

## ACTIVITIES & PRODUCTS

- Design and manufacturing of body armor vests, hard armor plates and equipment.
- Design and manufacturing of garments against foul weather.

## PROFILE

Ariexpo was founded in 1978 to promote the marketing, sales and support of diesel engines, propulsion systems, gearboxes and associated equipment in the fields of Marine, Defence, Railways, Energy production and Heavy vehicle Off- Highway applications.

It was incorporated in a form of Societe Anonym in 1982 and for the following 42 years Ariexpo Engineering S.A. has progressively expanded its activities in a variety of business sectors and has grown its material and human resources.

Ariexpo represents and promotes the interests of large foreign manufacturers with a market-leading position in the various market segments.

## ACTIVITIES & PRODUCTS

Ariexpo has traditionally cooperated with the Defence industry since its establishment. We acted as prime contractor, service partner, subcontractor and consultant in almost all projects of the Hellenic Navy in the last four decades. We are a strategic partner of the Light Governmental marine sector which covers Coast Guard and Fire Brigade vessels.

Our activities, includes:

- Supply and technical support of diesel engines and complete marine propulsion systems.
- Supplier of complete propulsion and auxiliary systems for Light Government and Commercial Vessels.
- Supply of Military vehicles.
- Supply of rapid-build, pre-engineered modular steel bridges for military & civil applications.
- Designer and main contractor in converting special military vehicles and developing upgraded prototypes.
- Supply and technical support of Electrical Power production units - diesel and gas Gensets and others.
- Propulsion systems, auxiliary equipment and spares for the Railways.
- Engineering, consultation or prime contractor in repowering, conversion, modernization or major refurbishment marine projects.

## PROFILE

ATCOR is a privately owned company headquartered in Athens, founded in 2008, dedicated in providing tailored engineering solutions and ground equipment technical support and On-site maintenance.

## ACTIVITIES & PRODUCTS

- On-Site maintenance and technical support for Air Defence Radars, HR-3000, RSRP, Marconi S743, SATCOM, MPDR-90
- Technical Support for Deployable ACCS
- DLM, OSM and PDS for Deployable Air Command and Control Center
- Teardown - Relocation - Deployment - Set up for ground based systems
- System restoration and anticorrosion protection
- Solution-focused design and manufacturing of obsolete spare parts for radar systems.

## PROFILE

ATESE S.A. is a Greek Company established in 1998. Our division are:

- **DEFENCE & SECURITY DIVISION**  
Military Infrastructure Works (Ports, Airports), Shelters and Hangars Supply & Construction, Command & Control Systems, Security Systems, Geographic Information Systems, Intelligent ERP System's Framework, Systems Interfacing / Interconnectivity
- **CONSULTING & HIGH-TECH PROJECTS DIVISION**  
ATESE S.A. is capable of delivering turn-key projects in several important sectors: Airport Systems, Environmental Projects, Meteorological Projects, Telecommunication's & High-level Software Projects
- **CONSTRUCTION ENGINEERING DIVISION**  
ATESE S.A. holds a 5th grade Government license and long-term experience on design and construction of projects such as: Public Private Partnerships (PPPs), Building Infrastructure, Special Roadworks, Ports, Harbor works, Civil Airports, Sophisticated MEP works, Military Construction Works, Private Sector Works
- **OFFSETS DIVISION**  
ATESE S.A. is one of the qualified and registered companies in the Ministry of Defence (DGDA) to perform offset obligations with main customers the major defence companies such as Safran Group, MBDA, Dassault Aviation, Thales, Harris, Indra, BAE Systems etc.

## ACTIVITIES & PRODUCTS

DEFENCE & SECURITY DIVISION:

Operating and Monitoring Systems:

- Security Area Command & Control System
- IC2ARUS - Integrated Command & Control Aviation Reliability Upgrade System
- FLIPS - Flight Planning System
- ODOS - Operations Distributed Object System
- MAXIS - Modular Adaptive XML Interfacing System

Military Construction Projects:

- Hangars & Shelters
- Building Infrastructure

CONSULTING & HIGH-TECH PROJECTS DIVISION:

- Airport Systems
- Environmental Projects
- Meteorological Projects
- Telecommunication's & High-level Software Projects

CONSTRUCTION ENGINEERING DIVISION:

- Construction & Development:
  - Civil Airports: Alexandroupolis, Thessaloniki (Northern Greece), Sitia (Crete) etc.
  - Roadworks: Peloponnese, Central Greece
  - Harbors: Souda, Sitia (Crete), Elefsis (Central Greece)
  - Buildings: Office Buildings, Industrial Units, Educational Units, Shopping Centers, Residential Development Projects
  - Military Works: Araxos Airbase (NATO project), Skyros Airbase, Kastelli Airbase, Limnos Airbase, Tanagra Airbase, Haidari Landforces Military Camp, Elefsis Airbase, Souda Naval Base, Skaramangas - Elefsis Naval Base, etc.

## PROFILE

Axon Engineering (legal name Axon Michanologiki S.A) was founded in 1985 as a precision engineering manufacturing company.

Axon employs some of the most skilled professionals in our industry combining engineering expertise and more than 38 years of technical experience.

Our aim is to offer our customers a complete Engineering solution by maintaining good lead times, on-time delivery, quality and reliability at competitive prices.

We provide all the necessary services of a "one stop shop" supporting customers through the full production cycle, all the way from sourcing and manufacturing to assembly, delivery and after sales support of the products.

Axon manufactures a wide range of products for companies in sectors such as aerospace, defence, electronics, naval, optics and telecommunication.

One of our areas of expertise is built to print maintenance tooling, ground support equipment and fabrications for the commercial and military aerospace industry.

## ACTIVITIES & PRODUCTS

- Research & Development
- Project Management
- CAD / CAM Design
- Machining - Wide range of CNC & Conventional Machines
- Welding (ASME Section IX & EN certified)
- Aircraft tooling & Ground Support Equipment
- Fabrications
- Special Finishing Processes (Painting, Black oxide, Alodine, Anodize, Deconyl Plastic coating)
- Assembly
- N.D.T (Penetrant & Magnetic) - Load & Pressure Tests
- Marking - Laser Engraving
- Special Packaging Solutions
- Worldwide procurement & delivery capabilities
- Fully equipped Quality Control department (Mitutoyo CMM, Romer Absolute Arm and various testing and inspection equipment)

## PROFILE

B&T Composites S.A., located in Florina, Greece, specializes in manufacturing composite superstructures utilizing carbon and other advanced fibers, combined with metallic parts to create hybrid solutions. Our comprehensive offerings span from preliminary design and engineering to manufacturing and testing, ensuring quality, reliability, safety, and efficiency across a wide range of applications.

In our pursuit of innovation, B&T Composites has integrated optical fiber sensors (FBGs) into our structures, effectively embedding a nervous system. This smart technology enables real-time monitoring of various phenomena, including structural health, hydrogen permeation, temperature, strain, and more. Additionally, the readout electronics are designed and assembled in Florina, ensuring seamless integration and reliability.

Our state-of-the-art production facilities are equipped with the latest technology and software, ensuring the highest quality standards for our products. We monitor and trace each individual product from order submission through all steps of production until delivery to the client, guaranteeing transparency and accountability.

## ACTIVITIES & PRODUCTS

We provide advanced solutions across several sectors, including:

- Marine: Torque transmission shafts and on-deck applications
- Wind Energy: Spacers and lightweight cranes
- Industry: Rollers for the printing industry
- Infrastructure: Piping systems
- Energy: High-pressure tanks

Employing the latest engineering, manufacturing, and testing techniques in our cutting-edge facilities, we handle a wide range of reinforcements and manufacturing methods to deliver premium, in-house components. Our commitment to excellence ensures that we meet the exacting standards required by the defence industry.

## PROFILE

BARRACUDA is an all-Greek company that has been operating for more than three decades in a 4,000 sq.m. factory, with manufacturing experience in the inflatable boat market.

Faithful to its values of QUALITY, CONSISTENCY and RELIABILITY, it has succeeded in incorporating them into its handcrafted boats.

Thanks to its strict specifications for the choice of construction materials and serious quality control at all stages of production, it is able to present boats with a modern technological concept.

Today it has added to its fleet a new USV model, the 747MM, and finally the innovative new 12 meter cabin boat, the 1170Pyxis.

## ACTIVITIES & PRODUCTS

- AS Automatically inflated boats:  
340AS, 360AS, 470AS
- Series P:  
230P, 250P
- Series S:  
340S, 360S, 380S, 420S, 480S
- Series Rib:  
250Rib, 400Rib, 457Rib, 547Navy, 597Rib, 700Military, 700Naval Force, 747Navy, 850Aphrodite, 900Satellite, 980C, 1170Pyxis
- Series USV:  
597MMv, 747MMv
- Floats & Floats covers for Helicopter & Aircrafts
- Cabin drain system for Helicopters
- Lifting bags cylindrical and parachute type capacity 100kg - 35,000kg (shipwreck, sunken ships, immersed objects)
- Inflatable Marine platforms
- Insulated baskets 1000Volt
- CSM Neoprene Fenders
- Inflatable concrete mold

## PROFILE

C&A Stavros Kassidiaris S.A., leader at Marine Automation and Process sector, was established in 1978. Today is housed in private facilities at Piraeus, employs 60 persons as permanent staff and leads a group of 3 companies in Greece and also 3 companies abroad.

Our company covers full range of study - design - manufacture for Electronic - Electrical - Pneumatic Automation Systems.

In our company's client list are included the total of the Marine companies in Greece, great companies of abroad, shipyards, refineries, chemical and food industries and also public organizations.

The company's philosophy is the maximum customer's satisfaction and for this reason our staff is constantly training, offering services at all ports throughout the world and has a warehouse with large stock of goods.

## ACTIVITIES & PRODUCTS

In the activities of the group are included the following:

- Installation & service of electric & pneumatic automation systems
- Construction of power distribution and automation panels
- Construction of engine monitoring systems, boilers' control panel and tank ullages measuring systems
- Calibration services & Certificates
- Recondition of marine equipment
- Represents more than 50 international makers of marine equipment
- Supply of Electrical - Hydraulic & Pneumatic components and instruments
- Construction of special pressure/level transmitters

Our service engineers are available 24hours for attending all over the world.

## PROFILE

CENSUS, a leading cybersecurity provider, safeguards organizations from cyber threats by developing tailored security strategies.

Serving from SMEs to Fortune 500 companies and international organizations across various industries, CENSUS leverages its scientific expertise, cybersecurity engineering, and in-house research to offer comprehensive security solutions.

These include Product Security Professional Services, Organization Security, and Advisory Services, ensuring data-driven, engineering-driven, and compliance-focused protection.

With a team of over 85 certified Cybersecurity Engineers, CENSUS is committed to providing the highest level of security for its partners.

## ACTIVITIES & PRODUCTS

As a leading cyber security company, CENSUS is renowned for its extensive technical expertise and in-depth research in safeguarding critical infrastructure across various domains.

Our team possesses unmatched understanding of complex ecosystems, including real-time operating systems (RTOS), embedded systems, hardware security, and application security.

Leveraging in-house lab expertise, CENSUS actively conducts extensive research and vulnerability assessments on critical infrastructure components, fueling the development of solutions addressing confidential computing, virtualization for edge devices, cloud security, and application security.

Additionally, we perform proactive security assessments using the latest attack techniques and in-house vulnerability research to identify established vulnerabilities and potential zero-day threats. Our comprehensive security services, tailored for defence, include Product Security Assessments (including Secure by Design and Security Architecture), Organizational Security (Offensive Services simulating Advanced Threat Attack: Red Team, Purple Team and Defensive Services: Blue Team, White Team), and Advisory Services, covering governance, design, and targeted research on defence and military technology.

## PROFILE

Componous is a dynamic startup, aiming to revolutionize embedded optical fiber sensing in composite materials and beyond.

With a vertical integrated scheme, Componous is a comprehensive one stop shop offering complete sensing kits, from software and hardware to complete support.

## ACTIVITIES & PRODUCTS

Componous develops and manufactures in-house optical fiber Bragg grating and microstructured sensors interrogators.

Componous is also developing and manufacturing custom made optical fiber sensors in standard and non standard optical fibers, while it has developed unique, patented techniques for embedment in composite materials.

## PROFILE

Cosmos Business Systems is one of the main Systems Integrator in Information Technology and Telecommunications in Greek and Cypriot market.

The company's objective is to offer integrated Turn-Key Solutions in IT Infrastructure, Networking & Telecoms, Software & Consulting, Services, Security and Printing to Industrial and Commercial Markets and to Business Professionals - focusing mainly on the middle and large corporations of the Private Sector, Public Sector, Banking and Telecoms.

CBS collaborates directly with HPE, HP Inc., IBM, Dell, Lenovo, Cisco, Avaya, Huawei and Microsoft.

CBS is a service provider for HPE, HP Inc., Dell, Huawei, IBM, Lenovo, Cisco and Avaya.

## ACTIVITIES & PRODUCTS

Cosmos Business Systems S.A distributes all activities in six (6) Strategic Business Units (SBU's) which are:

- IT Infrastructure:  
Data Center, Security, Back-up, Virtualization (MS, VM), Disaster Recovery Solutions
- Networking & Telcos:  
Networking, Unified Communication, Voice Over IP, Wireless Solutions
- Software & Consulting:  
Software & Consulting, Software Applications, Microsoft NAV (ERP), Microsoft CRM, Business Process Management (BPM), Share Point Portals, .Net Applications, Web Applications, Custom Applications, Applications using AI/ML.
- Services:  
Managed Services, Data Center design & implementation, Service Contracts, Bench Service Center, Hosting & DR Services, SLA, Warranty services, Professional Services, Reengineering, Outsourcing services
- Cyber & ICT Security:  
Risk Assessment/Risk Treatment, Vulnerability Assessments (VA), Endpoint Protection, Cloud Email Anti-phishing, SIEM/DLP, VPN, Teleworking & Network Security, GDPR, DPO Services
- Printing:  
Imaging & Printing, Printing Solutions, Managed Print Services, Retail Solutions & POS

## PROFILE

Our company specializes in the manufacture of metallic and non-metallic precision parts by using modern CNC machines.

Our export activity covers almost the whole of Europe but our most important markets are Germany and France.

In the company we have and apply ISO 9001:2015 quality management system and ISO 14001:2015 environmental management system.

We pay a lot of attention to timely and on schedule delivery of parts and we always try to guarantee the delivery time.

The raw materials we use come from European factories and are always accompanied by the corresponding certificates.

We always invest in quality control because we believe it is one of the most important parts of our job.

## ACTIVITIES & PRODUCTS

Our company specializes in the manufacture of metallic and non-metallic precision parts by using modern CNC machines (milling machines, turning machines, mill-turn machines, 5-axis machining).

We have an in house quality control department with various certified measurement instruments like CMM machine Mitutoyo BRT 9166, Mitutoyo Linear Height LH 600 F, surface roughness tester, micrometers Hardness Tester and much more, inside a room with stable climatic conditions 24/7 (temperature and humidity).

## PROFILE

Hellenic Defence Systems S.A. (EBO-PYRKAL) or EAS s.a. is the only Greek defence industry which for 150 years has been engaged in the design, development, manufacturing and trading of NATO type guns, weapon systems and ammunition. EAS has been established in 2004 after the merging made in by the: "Greek Powder & Cartridge Company S.A." better known as "PYRKAL" "Hellenic Arms Industry S.A." better known as "EBO".

EAS range of production includes guns, weapons, weapon and missile systems as well as ammunition of small, medium and large caliber. Furthermore EAS is dealing with:

- The maintenance and upgrading of anti-aircraft weapon and missile systems.
- The manufacturing of missile parts.
- The upgrading and modernization of weapons and weapon systems.
- The inspection, evaluation, collection and demilitarization of ammunition and,
- The static & ballistic tests of guns, ammunition and bulletproof materials.

EAS Headquarters are located in Hymettus, near to the centre of Athens.

The plants of the company are located in Attica and Achaia Prefectures. EAS workforce is more than 400 persons.

EAS is a State - owned company. Having as main shareholder the Hellenic Ministry of Finance, the company is supervised by the Ministry of National Defence.

## ACTIVITIES & PRODUCTS

- Development and Production of:
  - Infantry Weapons,
  - Weapon Systems,
  - Missile Systems,
  - Ammunition,
  - Accessories & Spare parts for Infantry weapons,
- Upgrading and Modernization of weapons,
- Maintenance of weapon & missile systems,
- Testing, evaluation, collection and demilitarization of ammunition,
- Ballistic and Static tests of:
  - Ammunition,
  - Weapons and
  - Material.

## PROFILE

EFA VENTURES, is a technology consulting firm that provides a wide range of specialized integrated services in the Defence and High Technology.

With more than 30 years of experience and a wide international network of partner companies, EFA VENTURES, operates on international scale, in many countries around the world.

EFA VENTURES provides a broad range of integrated services such as strategic advisory, requirements definition, industrial planning and implementation, program management, supply chain management and logistics, international business intelligence and industrial collaboration projects.

## ACTIVITIES & PRODUCTS

EFA VENTURES offers Aircraft specialized services with focus on Firefighting through Aircraft Wet Lease, Aircraft systems support and upgrades, Aircraft Maintenance and Repair and Overhaul Services (MRO) and Uncrewed Aerial System design.

EFA Ventures is the driving force behind [epicos.com](http://epicos.com), the leading Global B2B information platform for the Aerospace Defence and High Technology Industries, as well as the only global industrial cooperation consultancy and service provider.

Main activities include

- Aircraft systems support and upgrades
- Aircraft Maintenance, Repair & Overhaul (MRO) services
- Supply chain management
- Uncrewed Aerial Systems Solutions

## PROFILE

EL.IN. s.a. was established in 1982, in the area of Grevena, which is in North Greece and occupied with the construction of agricultural machinery and spare parts. In 1989 modified to an S.A. company and afterwards in 1991 built a modern industrial premises, with the intension to expanding its production capabilities to special industrial applications.

Meanwhile, at the same time with our moving into our brand new facilities in 1991, the company expanded and invested in business market as well as in renovation of equipment, in order to improve not only the already existed product lines, but mainly to extend the wide variety of its products.

The outcome of this modernization is the establishment of cooperation since 1995 with the Public Power Company (PPC) into forged and other spare parts construction sectors for the PPC's Steam Electric Power Plants, but mostly for the mines of Lignite Centres of Ptolemaida and Megalopolis, a collaboration which constantly requires to improve the quality of our products, with the appropriate choice of high standard raw materials and continual quality controls. Moreover, since 1998 as a prime or as a sub-contractor have been manufacturing steel forged track shoes parts for the needs of the Ministry of Defence and NSPA / NLSE (Certified supplier for NATO with the NCAGE code G0528).

## ACTIVITIES & PRODUCTS

Production sectors:

- Tracks shoe & metal, metal with rubber track shoe's parts:
  - Track shoes for 'Leonidas', 'Leo I', 'M88' 'M113' e.t.c.
  - Spare Parts for military purposes
  - Rubber - Metal parts for track shoes 'Leonidas', 'Leo I', 'M88', 'M113' e.t.c.
- Induction Surface Hardening to metal (military & civil industrial) parts:
  - Track shoes' spares for M60 (T-142) / M88A1 (T-107) / M48A5 (T-97E2) / LEO I A4 (D-640) / LEO II HEL (D-570 FT) / M113 (T-130) / LEONIDAS Hel (\*5463) / LEONIDAS (Cyprus) / M110 (T-132) / M109 (T-136, T-154, D-109) / M107 (T-132E1) / PZH 2000 (D-340).
  - Spare parts for MBT (Main battle Tanks), APC (Armored Personnel Carrier) & SPH (Self-Propelled Howitzer)
  - Thrills and bearing bodies
  - Gears of all modules (Straight, Helical, Planetary, Racks & Pinions, Sprockets e.t.c.)

## PROFILE

ELMON is a dynamic company operating with key partners worldwide to provide the best possible life-saving solutions to professional end-users. We are leading ballistic equipment suppliers to the police and military forces in State Agencies and Private Security Corporations in more than 20 countries.

ELMON is an official NSPA (NATO Support Agency) supplier with Cage Code G1454 supplying NATO member countries with its products.

## ACTIVITIES & PRODUCTS

### Main Product Line:

- **Bulletproof Vests (Carriers and Ballistic Soft Panels)**  
A wide range of bulletproof vests is offered to meet specific applications and demands. Only the best, low weight/high performance materials from leading suppliers (Dyneema, Honeywell) are used in all the production process.
- **Tactical Gear plate carriers**  
Quick release system with Molle polyamide webbing, ergonomically designed to ensure flexibility and comfort under any circumstances. Breathable lining and proof grip for emergency getaway.
- **Ballistic Hard Plates**  
Hard ballistic plates provide protection from all kinds of threats. Available for protection levels according to NIJ Standards: III, III++, IV. They can be used as stand-alone with low weight and thin profile.
- **Ballistic Helmets**  
A range of light weight and high performing helmets are offered, based on the popular PASGT and High-Cut shape, to meet particular operational requirements. Standard features include 5-point harness system, high fragmentation velocity (V50), NIJ Level IIIA protection.
- **CBRN SUITS**  
Designed to provide protection against direct contact with and contamination by radioactive, biological or chemical substances to nuclear hazards. The CBRN protective clothing is easy to use and has a good comfort for the wearer.

## PROFILE

ELVIK S.A. established in 1982, is a pioneer and leader in incombustible materials manufacturing, i.e. panels, doors and ceilings, for the interior spaces of vessels as well as land projects.

Having a portfolio of more than a thousand vessels featuring ELVIK S.A. products installed and a number of buildings (Greek Ministry of Transportations etc.), this second generation company is also a substantial supplier of many Hellenic Navy vessels throughout the course of time.

ELVIK S.A. headquarters are located in Piraeus, the center of maritime entrepreneurial world in Greece, whilst in its highly sophisticated 3.000m<sup>2</sup> factory, a production line is set in order to daily meet the demands of four different projects at the same time.

With a vast list of customers in Greece and all around the world, ELVIK S.A. makes sure that all customers get the best quality material for the best price in scheduled time.

## ACTIVITIES & PRODUCTS

ELVIK S.A. manufactures panels, doors and ceilings. All products consist of dip hot galvanized steel assembled with mineral wool. Production line includes bulkhead (lining) panels, partition panels and ceiling panels as well as cabin and bathroom doors.

All relevant accessories (profiles, etc.) are also manufactured plus ELVIK S.A. has a range of inspection doors, ceiling hatches and USPH panels.

A series of special panels ("T" shaped, "L" shaped and cross-shaped) is available as well and - if requested - ELVIK S.A. can further undertake "turn-key" projects.

Amongst the vessels supplied with its materials all these years, one can find out that many army navy ships.

From landing crafts, to mine sweepers, to general support ships, ELVIK S.A. has managed to have its products in a great number of them, providing a completely certified series of products.

Furthermore, concerning Hellenic Navy collaboration, ELVIK S.A. is maintaining a longtime relation by supplying materials in a number of vessels, i.e. Orion, TPK Arlioths, TPK Mpatsis, A/G Lesvos, TPK Troupakis, K/F Armatolos, TPK Vlahavas, TPK Laskos, P/F Yperion, Y/F Prespa, Y/B Nhreys, A/G Hios, A/G Samos, A/G Ikaria, A/G Kriti, TPK Pezopoylos, F/P Karavoyannos, Prometheus, Tpk Sakipis, Aris.

## PROFILE

ELVO S.A. is the historical partner of the Hellenic Armed Forces and government authorities for 50 years, with a proven track record of design, development and manufacture of military, civilian and special use vehicles, including the "LEO 2A6HEL" MBT, the APC "Leonidas", the Mercedes-Benz 240GD/290GD 4x4 vehicles, the up-armored HMMWV, the Steyer logistic trucks etc. All these vehicles are still in service with the Armed Forces.

ELVO S.A. applies and maintains Quality Management System ISO 9001:2015, Environmental Management system ISO 14001:2015 and NATO Industrial Security Certification.

## ACTIVITIES & PRODUCTS

### Facilities and Shops:

- Located in Thessaloniki Industrial Area, in Sindos, Greece, the company has a total plant area of 273,000 m<sup>2</sup> (67.5 acres) out of which 66,000 m<sup>2</sup> are covered spaces for production, assembly and testing.
- Machine shop: Fully equipped with modern equipment including laser cutting machines, CNC boring and milling centers and CNC vertical and horizontal lathes.
- Test track: There is a 1.1-km test track with a 2.8 m fording tank suitable for testing any type of vehicle, either tracked or wheeled.
- EMC facility: Inside the facility there is a dedicated 600 m<sup>2</sup> EMC chamber, one of the largest in Balkans capable of accommodating an entire main battle tank such as the Leopard 2 MBT.
- Paint facility with two (2) 18m long paint booths.
- Port of Thessaloniki accessibility (5 km, in house direct connection by railway).

### Products and Services:

- Manufacture, assembly of all types of armored or non- armored vehicles (wheeled or tracked)
- Maintenance, repair, overhaul (MRO) of all types of armored or non-armored vehicles (wheeled or tracked), as well as related components and spare parts
- Mechanical and electrical works
- Replacements of complexes and general repairs of subassemblies

## PROFILE

EMMIS MARINE is today one of the few companies worldwide producing certified low voltage transformers since 1974, specially designed to meet the requirements of the marine industry.

Quality Control is carried out at all stages of the production process.

The product portfolio provides also integrated systems and high value-added solutions in the sectors of electrical power supply, control, and power quality.

The company has upgraded the quality of its products so as to meet the specific needs of defense applications even more closely, including the minimization of energy losses, contributing to the reduction of the energy footprint.

## ACTIVITIES & PRODUCTS

EMMIS provides premium electrical supply, control and power quality systems for the industry, marine, hospital and constructions sectors. Our systems consist of:

- Transformers (certified by Lloyd's Register, BV and TUV SUD)
- Current transformers
- Auto-transformers
- Active harmonic filters
- Energy analyzers & meters
- Temperature control units
- Insulation monitoring devices
- I/O alarm units
- Voltage stabilizers

Our systems and solutions are exported and/or have been installed in large-scale projects in various countries of Western and Central Europe, Middle East and America.

We have a high-tech fully-equipped quality control department. We follow the strictest international quality control standards from the receipt of raw materials to the final pieces. All our products are checked one-by-one.

We provide technical support, solutions and advice using new technologies, updated management and test records and provision of spare parts.

## PROFILE

EMTECH is a group of four SME companies (EMTECH SPACE S.A. and ANGELY P.C. in Greece, EMTECH GMBH in Germany, and EMTECH SPACE P.C. (CY) LTD. in Cyprus) interested in research and development for innovative products and high technology services in the Aerospace, Energy, and Defence & Security markets.

Major customers in the space market are the European Space Agency, AIRBUS, THALES ALENIA SPACE, LEONARDO, TELESPAZIO, ALTEC, etc., offering services for spacecraft simulators, ground segment software, Independent Software Verification & Validation, as well as facilities for measurement and modelling magnetic fields of electronic equipment, and Electromagnetic Compatibility (EMC) services. In Defence & Security markets, the company offers situational awareness software based on Artificial Intelligence and simulations, as well as Magnetic Anomaly Detection (MAD) solutions. In the energy market, major customers are the Greek distribution system operator HEDNO S.A., and transmission system operator IPTO S.A., offering smart-grid solutions based on artificial intelligence, system optimization, and IoT with EDGE processing. The company has interest (and currently participates) in National and European Research & Innovation Projects.

EMTECH is member of HASI [Hellenic Space Technologies and Applications Cluster (si-Cluster)], IENE (Energy Institute of Southeast Europe) and SEKPY (Hellenic Manufacturers of Defence Material Association).

## ACTIVITIES & PRODUCTS

EMTECH has interest in two markets: Space and Energy Smart-Grids. The following tree describes our products and services in these two markets.

- Space Market
  - Space Software
    - Software Simulations Systems (Mission Analysis, Functional Engineering Systems, Software Validation Facilities, Operational Simulators, End-to-end Simulators) - Service
    - Software Engineering for Ground Segment Applications - Service
    - Independent Software Verification and Validation (ISVV) - Service
  - Space Magnetics
    - Spacecraft Magnetic Cleanliness - Service
    - EMC Test and Certification - Service
    - Snapshot-Multi-Magnetometer-Facility - Product
    - Suitcase-Multi-Magnetometer-Facility - Product
    - CubeSat ADCS validation Facility - Product
- Energy Smart-Grids
  - iReact-Solution: Power Distribution Substation Automation - Product
  - iDERgridy: Distribution grid management - Product
  - THORACLE: Distribution grid digitalization - Product
  - COMFORT: Air quality and energy management in buildings - Product

## PROFILE

EODH is a defense and security company based in Greece, specializing in innovative protective technologies and survivability solutions for high-end platforms worldwide.

With a 20-year track record, EODH has a proven ability to address complex defense and security challenges. Our expertise in creative engineering and market-driven solutions ensures the delivery of future-focused vehicles, advanced upgrade packages, and cutting-edge protection systems to counter modern threats. Continuous development of our products significantly enhances protection levels, signature management, and mobility while meeting the highest quality standards.

Through intensive Research and Development (R&D), EODH continuously introduces innovations in materials, manufacturing processes, and systems to deliver high-quality products, technologies, and services. Our unique solutions and upgrade packages are trusted by leading OEMs and Armed Forces worldwide.

EODH is a preferred partner in the Leopard 2A8, Leopard 2A7, BOXER, and PUMA programs, as well as in the development of other modern armored fighting vehicles (AFVs). The company plays a key role in the manufacturing and integration of protection solutions for major defense projects in Europe, the U.S.A., and the Middle East.

A vivid example of EODH's new era is the recent ASPIS Agreement, securing protection solutions for both current and future Leopard Family vehicles and the next-generation Main Battle Tank (MBT).

## ACTIVITIES & PRODUCTS

EODH's protection Technologies:

- ASPIS: "Advanced Shielding Platform Integrated System"
- Active Protection and Anti-Drone Protection Solutions
- Reactive Protection - ERA
- Passive Protection - Ballistic Protection
- Signature Management (Thermal, RCS, Optical, Accoustic)
- IED, APFSDS, Shaped Charged, ATGM Protection
- Mine/Blast Protection
- Advanced Transparent Armor
- Liner System for Spalls and Fragments
- UAV & UGV Protection Solutions
- Applications for Ground, Naval, Air Platforms and Critical infrastructures

EODH's Armored Vehicles Protection Kits:

- Leo 2A8, Leo 2A7 and Leo 2A6 Hel
- BOXER IFV
- PUMA IFV

EODH's Upgrade Packages:

- Leo 1 Hel
- Leo 2A4 ASPIS
- Leonidas 300 (4K7 FA)
- M-113HEL
- AMX 30

EODH's Vehicles:

- Hoplite Armored 4x4 High Mobility Tactical Vehicle
- Unmanned Ground Vehicle (UGV)

## PROFILE

ETME is a company originating in the 70's with a strong innovation profile and a long track record of involvement in major engineering Works in Greece. The company has been active in major infrastructure works as consultant with a focus on Hydro infrastructure works such as ocean works, dams, weirs, canals, irrigation works, aqueducts, flood protection and drought protection heavy infrastructure works. During the last 10 years, the company has expanded its area of interest into the renewables and R&D in the fields of Hydro and Energy. For the last 8 years the company designed and constructed a disruptive and innovative solution for the Offshore Wind Industry, a floating platform (FloatMast®) for wind resource measurements. Recently (2015 and 2018), FLODAR, a new innovation by ETME, has been awarded by the European Defence Agency for its dual use in both the renewable energy sector and the sector of maritime surveillance anti-piracy, illegal sea border crossing, illegal fishing, security threats) by proposing a new permanent unmanned and autonomous multi-sensor surveillance platform. Finally, in the last four years ETME entered the Defence and Security Market. After systematic and persistent work, research into new technologies and culture of collaboration, the innovative Greek company ETME managed to lead within the framework of the European Defence Industrial Development Program for two consecutive years (EDIDP 2019 & 2020).

Today, ETME leads and coordinates two partnerships in two of the largest defence capability development projects (DECISMAR "Decision Support Toolbox for enhancing the feasibility study of the Upgrade of Maritime Surveillance through the integration of legacy assets with new innovative solutions" and USSPs "Development of Unmanned Semi-fixed Sea Platforms for Maritime Surveillance") co-financed by the European Commission and under the financial and technical support of the Greek and Cypriot Ministries of Defence.

## ACTIVITIES & PRODUCTS

Products include persistent autonomous mini offshore platforms equipped with mast that serve as surveillance and recognition bases for UAVs and radars.

Services include dynamic feasibility studies, design and project management of offshore platforms, marine infrastructure works and maritime surveillance system configuration.

## PROFILE

Since the late 80's, EUROTRADE has been manufacturing modular steel buildings (parts, entire units and turn-key solutions), building flexibility and know-how and has contributed in some of the most important large-scale development projects mainly in Greece and Europe, but also in other parts of the world.

Today, with a state-of-the-art factory located in the Industrial Area of Oinofyta Voiotia, our high caliber executives, expert associated architects and engineers and a highly specialized, extensively trained technical team, EUROTRADE builds on its core values, offering the best-of-class solutions, meeting every housing need, whatever the challenge.

## ACTIVITIES & PRODUCTS

Since 1989, EUROTRADE in close collaboration with the armed forces in Greece, is the most reliable «alliance» in facing any housing need.

Designing and studying the army's housing requirements each time, it delivers timely every project offering excellent, reliable and economical solutions. Warehouses, seminar classrooms, sanitary facilities, changing rooms, resting areas, dormitories, shelters and innumerable housing needs are covered through our wide range and our ability to design particular and specialized structures.

Since 2009, EUROTRADE is one of the major manufacturers of bulletproof constructions having installed a great number of bullet proof cabins, in front of Police Stations and having upgraded the ballistic level, in three of the major prisons. At the same time, EUROTRADE has also presented to the Greek Market and worldwide the two new series of impressive design and high armoring ballistic resistant guard posts, both of impressive design and high armoring. Security and defence projects of importance have been executed with our products throughout Europe.

## PROFILE

f society® is a consulting firm specializing in security, risk management, and compliance, with a strong presence in Greece and international markets. Founded during the economic crisis, it defied the brain drain by delivering high-level services to significant entities. Leveraging extensive expertise and experience, f society® has developed a unique problem-solving methodology that adds value to its clients, offering comprehensive solutions in information security, from design to implementation and auditing.

With over 400 successfully completed projects across defence, energy, and high-tech industries, f society® holds numerous certifications, including ISO 9001:2015, ISO 27001:2013, and ISO 27701:2019. The firm is also a certified supplier of technology and compliance services for the United Nations Global Marketplace (UNGM).

f society® actively participates in European research programs, consistently pushing the boundaries of innovation in its sector, and is recognized for its commitment to sustainability, having achieved Platinum rating by EcoVadis.

## ACTIVITIES & PRODUCTS

f society® offers a comprehensive range of consulting services in security, risk management, and compliance, tailored to meet the needs of both public and private sector clients in Greece and internationally.

The firm's expertise spans the full lifecycle of information security, providing end-to-end solutions from initial assessment and strategic planning to implementation, auditing, and ongoing support.

Additionally, f society® provides risk assessment, incident management, and business continuity planning services, helping organizations anticipate and mitigate operational risks. The firm's commitment to innovation is further highlighted through its participation in cutting-edge research projects, ensuring that clients benefit from the latest advancements in security technologies.

## PROFILE

FEAC Engineering P.C. is an engineering & consulting company, highly specialized in Simulation Driven Product Development & physics-based Digital Twins.

The company is based in Greece and operates in the global market by developing and providing specialized simulation software and consulting services, to solve challenging & complex engineering problems.

## ACTIVITIES & PRODUCTS

FEAC's worldwide awarded services range from Computer Aided Design (CAD) drafting, advanced multi-physics Finite Element Analysis (FEA), Boundary Element Analysis (BEM) and Computational Fluid Dynamics (CFD) to Structural Health Monitoring (SHM) and design optimization techniques. There is extensive experience in project management & certification of products (CE marking) as well. FEAC combines 1D-simulation (aka system simulation) with detailed 3D simulation techniques (CFD, FEM, BEM) to build up a comprehensive Digital Twin of the process or object/assembly, not only in the phase of the development, but also in the phase of realization (manufacturing process) and operation (under operational conditions). This allows FEAC to create a Holistic Digital Twin throughout the product's lifecycle. Our expertise is to develop multi-physics, high-fidelity simulations that couple structural mechanics, heat transfer, fluid flow, electromagnetics, acoustics, etc., and represent the mechanical behavior of components under complex environmental conditions.

Due to the company's high expertise in Simulation, Siemens Digital Industries Software has appointed FEAC Engineering as an official authorized partner of its CAE portfolio in the South-East European Region. FEAC develops PITHIA-CP, a world-leading Boundary Element Solver for Cathodic Protection Digital Twins, which is used by SIEMENS as an add-on on its Simcenter 3D software portfolio

FEAC has offered its expertise in physics-based simulations to numerous engineering companies, product manufacturers from a wide range of industries, research centers and universities yielding to an impressive portfolio of delivered projects. The company has strong presence in all Industry sectors, counts several collaborative projects with the Greek Navy and participates successfully in projects and consortiums funded by EDF or EDA.

## PROFILE

The GA Aviation Services S.A., was founded as Greek Air in 1977 and was established in the Greek Aviation market both in the repair and maintenance of helicopters and light aircraft as well as in the supply of spare parts and mechanical accessories to large airlines and military units.

Our offices are located in the facilities of the new privately owned and fully licensed Heliport in Koropi, Attica, with a total area of 30,000 sq.m., very close to the airport El. Venizelos and with easy access from Attiki Odos.

It has a hangar of 1,000 sq.m. for maintenance and housing of helicopters, 1,400 sq.m. for engine shops, offices, training room, spare parts warehouses, lubricants and crew resting areas. There is a passenger waiting area and car parking within the area.

The privileged position of the Heliport offers easy access throughout the country, especially in the southern part and the Aegean islands.

In addition, we have a light aircraft maintenance hangar of 1.620 sq.m. at Pachi - Megara Airport.

Our company is an Authorized Service Center of the following manufacturers:

- LEONARDO HELICOPTERS (Agusta Westland)
- TEXTRON AVIATION
- CESSNA / CIRRUS AIRCRAFT
- DIAMOND AIRCRAFT
- CONTINENTAL DIESEL ENGINES
- TECHNIFY MOTORS

## ACTIVITIES & PRODUCTS

Repair and Maintenance of Helicopters and Aircrafts, Sales of aircraft parts, components and consumables, Evaluation and Technical Reports as well as Consultation Support.

Within the framework of its activities, our company offers its services to the Greek State, covering the needs of material supply and the management of repairs of units and spare parts for the Hellenic Aviation Industry (EAI), the Air Force, the Navy, the Army and the Civil Aviation Authority (CAA).

Our company also offers its services to helicopter and aircraft companies (AOC), private owners of helicopters and aircraft, both in Greece and abroad.

## PROFILE

GEOSYSTEMS HELLAS S.A. (GSH), a Greek SME founded in 2009, is a top tier provider of advanced geospatial software solutions, geoinformatics and data analysis. Activities focus on Earth Observation services, downstream space, Remote Sensing, Geographic Information Systems, photogrammetry, data management and platform development and integration. Geosystems Hellas is dedicated to providing geospatial intelligence and advanced software solutions that empower partners and clients to make informed decisions and succeed in their mission.

GSH is working on commercial Environmental, Photogrammetrical, Remote Sensing projects and R&D projects for land management, crisis management and Spatial Data Infrastructure (INSPIRE Directive) implementations. GSH is deeply involved in Big Data and Data Fusion and machine learning/deep learning techniques for European and National projects in Greece and establishment of infrastructure for spatial information (Metadata, Data Specifications, Data and Service Sharing and Monitoring and Reporting) and AI. GSH holds extensive expertise in regards to operational requirements/scenarios definition in fields of data exchange/sharing in an interoperability manner.

GSH is a member of European Association of Remote Sensing Companies (EARSC), Hellenic Association of Space Industries (HASI), Hellenic Manufacturers of Defence Material Association (SEKPY) and a founding member of si-cluster since 2014. GSH has an ISO certificates ISO 9001:2015, ISO 27001:2013, ISO 22301:2019, ISO 14001:2015 covering the products and services under the field of expertise and 'NATO SECRET'-'EU SECRET' clearance. GSH is a leading National provider of information technologies from 2009, that drive productivity and quality across geospatial and industrial enterprise applications. After 2014, operates globally in high-value, high technology areas focusing on helping clients to exploit new technologies and management styles. Its proven expertise has been gained from performing a broad range of projects. The solutions integrate sensors, software, domain knowledge and customer workflows into intelligent information ecosystems that deliver actionable information used in a broad range of vital industries.

## ACTIVITIES & PRODUCTS

- GNSS POSITIONING INFRASTRUCTURE FOR AUTONOMOUS MOBILITY. An ultimate advanced permanent GNSS station has been installed at the premise of Geosystems Hellas S.A. in Athens, Greece and is composed of dual GNSS receivers, dual GNSS choke ring antennas, routers, atomic clock and power.
- VesselSpot - vessel detection and identification based on several operational scenarios and scales
- Satellite and airborne multi-source land cover mapping and feature extraction
- Video analysis and object tracking via computer vision techniques (airborne, UAV)
- Terrestrial object detection - Computer vision technique by utilizing cameras on the ground or multiple cameras mounted on ground vehicles
- Satellite Imagery
- Hexagon Safety, Infrastructure and Geospatial software solutions

## PROFILE

GLASSART® S.A., since 1980, is a leading company in modular prefabricated buildings for dual use. From its own manufacturing facilities in Attica, it has developed and successfully launched advanced construction solutions and responds to projects of high ballistic and TNT explosive blast test requirements with immediate relocation ability specially designed for military use.

With unique know - how GLASSART® S.A. excels in the design and production of modern, flexible, innovative, ergonomic, timeless and turnkey solutions of unprecedented level of quality certification based on the highest international standards.

For personnel protection the Thorax Bulletproof Sentry Boxes manufactured according to NIJ 0108.01 Ballistic Resistance of Level IV and BR 7. For military treatment facilities our 2 in 1 Modulbox, is a fully equipped military Hospital Complex in compliance with NATO Protocols.

Our Company offers, robust, field-tested high technology solutions covering almost every military or police housing need.

## ACTIVITIES & PRODUCTS

GLASSART® S.A., since 1980, responds successfully to projects of complex construction requirements with modular housing multisystem, specially designed for military use, with unbeatable manufacturing speed and immediate relocation ability, easily and in a very short time.

GLASSART® S.A, in collaboration with defence industry organizations, designs and offers prefabricated military facilities as equipment booths, modular military administration buildings, mobile field hospitals, deployable shelters, bullet proof military guard houses, army barracks, portable office spaces, dining halls, dormitories, maintenance military structures, e.t.c, and has successfully completed major projects of high requirements under international safety standards as NIJ 0108.01, BR7 and TNT explosive blast test with triple certification ISO 9001, ISO 14001 and ISO 45001.

GLASSART® S.A., is an official NATO supplier and member at the registry of Hellenic Defence material manufacturers with many years of partnership with the Greek Armed and Police Forces.

## PROFILE

GRANTEX S.A. is member of the Hellenic Manufacturers of Defence Material Association (SEKPY) and is registered in the Directory of the Greek Manufacturers of Defence Material. The latter being managed by the Greek Ministry of Defence-Defence Industries technology and Research Dept.

Our advanced and updated laboratory is in close cooperation with approved foreign laboratories and we have been applying quality management system certified according to ISO 9001 as well Environmental management system certified according to ISO 14001. Last but not least, we have to state that we are ready to collaborate with any vehicle manufacturer, supplying them with our products, in the terms of OFFSET BENEFIT programs, enabling them to fulfil their relative commitments, deriving from contracts with the Greek Ministry of Defence.

We are the sole manufacturer in Greece producing friction materials such as Brake Linings, Brake Pads and brakes spare parts. We are currently producing 16.000 Brake Lining references and 500 Disc Brake Pad references suitable for the majority of trucks, buses and passenger cars, most of them certified according to ECE R-90 regulation (type approval).

Since 1976 all our products have been available in Non Asbestos quality. Based on experience of 30 and more years, we have developed our own know-how in the manufacturing of our products. It is worth mentioning the numerous customers not only within the local market but also throughout the globe.

Public organizations such as the Greek Railway Organization, the Public Power Corporation are being supplied with our products. We would also like to stress that since 1980, we have been appointed as suppliers for numerous public contracts (production & provision) related to the demands of the Hellenic Armed Forces concerning their needs for Friction Materials for all "M" series vehicle types, STEYR and other advanced technology vehicles.

## ACTIVITIES & PRODUCTS

Production and trade of Friction materials (Brake Linings and Disc Brake Pads for trucks/ buses) and automotive spare parts and machinery.

## PROFILE

Hellenic Aerospace Industry S.A., established in 1975, is the largest aerospace and defence industry in Greece, having as primary mission to deliver defence and aerospace services and products to the Hellenic State, as well as to both military and civil markets.

Operating as an integrated, one stop shop, combining cutting-edge technology with certified production procedures and exceptionally well-trained and experienced staff.

HAI offers products and services of the highest quality standards in the most competitive cost and delivery terms, thus acquiring a broad customer base, and establishing itself as a reliable partner of the leading aerospace industries globally, with important export activity.

## ACTIVITIES & PRODUCTS

- Total support for the aerial assets of the Hellenic Armed Forces and National Security
- Sole source supplier for the manufacturing and assembly of mid and plug panels for the C-130J aircraft [almost 70% of the aircraft fuselage - 1.200 different parts]
- Dual source supplier of F-16 aircraft major structural subassemblies [almost 30% of the aircraft fuselage]
- Maintenance, Repair And Overhaul (MRO) of T56 engines for the Royal Saudi Arabia Air Force (RSAF) C-130 Fleet
- F-16 aircraft structural and avionics upgrade (CCIP/FALCON STAR) for the United States Air Force stationed in Europe (USAF)
- Upgrade of 82 F-16 aircraft of Hellenic Air Force to the Viper version
- P-3B Orion Middle Life Upgrade - Phase Depot Maintenance (PDM) of one aircraft and Mid-life Upgrade (MLU) of four aircraft
- IRIS-T air-to-air missile design and manufacturing of dummy/captive air training missile and tactical umbilical adapter
- Participation of HAI in the first European stealth technology demonstrator - nEuron Unmanned Combat Air Vehicle (UCAV)
- Training for the United Arab Emirates General Head Quarters (GHQ)
- Design and implementation of Anti-Drone System "Telemachus"
- Implementation of Anti-Drone System "Centaur"
- Design, development of Unmanned Aerial Vehicle (UAV) "ARCHYTAS"

## PROFILE

HARLAS INTERNATIONAL TRANSPORT S.A. was founded in 1969, and her name have been synonymous with accountability, consistency and effectiveness in freight forwarding world. The continuous evolvement of the global network (440 agents worldwide), the five decades of 'know-how' and successional certifications, have fairly brought the company to the forefront of the domestic transit market.

The Air, Sea and Road transportation departments will serve you in any cargo project. Our vision is to stand side by side with the customers, to set the standard for excellence, having built up a strong relationship to reach together our exceptional intentions.

Our branch in the Athens International Airport "El. Venizelos" constitutes a strategic asset for the company, which enables us to handle the either imported or exported freights of our clients in no time and with continual overall supervision of the services. The supervision is exercised by our specialized staff that forms our airport team. Thanks to our perfect cooperation with the top shipping companies, we provide efficiently import and export cargo to all major seaports around the world.

The military supply chain involves careful planning, secure transportation on a global scale. Military transportation services also include the management of heavy and special transport projects, under strict deadlines. In addition, we participate in international tenders announced by NATO, its Agencies and NATO member countries and execute framework agreements for the Navy, Air Force, and transportation contracts with the Army.

- LCL, FCL and Break Bulk
- IMO Goods forwarding
- Issue of all required customs documents.
- Premium Insurance of your shipment
- standard / Frigo / combi trailer services
- full and part loads
- Door-to-door forwarding programs
- ADR goods handling
- 3LP Logistics services

## ACTIVITIES & PRODUCTS

- International air, ship and truck cargo transportation services management.
- Customs services management.
- Supply chain and logistics services provision.
- Management transportation of classified & non-classified military materials.
- Trade exhibitions services management, conferences, & artistic groups.
- Packaging, storage and transportation of art works, libraries, archives and valuable objects.
- Management transportation of dangerous goods & perishables.
- Management of special transportations.
- International and domestic packaging, storage and household transportation.
- Management transportation of live animals.

## PROFILE

HELLENIC INSTRUMENTS is a Greek based high technology company, specializing in the design, development and manufacturing advanced military, security and industrial electronics systems and software.

It is located in the industrial area of Koropi, near Athens International Airport, in modern facilities fully equipped with state-of-the-art electronic equipment and software development tools.

Our values and policies combine Quality, Corporate Social Responsibility, Security, Ethics and Environmental Protection.

The Quality Management System is certified according to ISO9001:2015.

We handle National-NATO-EU Classified Information and N-CAGE Code is G2310.

In December 2017 we were awarded the 1<sup>st</sup> Prize for New-enterprise Productive Excellence at "Made in Greece Awards 2017".

## ACTIVITIES & PRODUCTS

Development and Production in the following areas:

- Monitoring & Control Systems (Data Acquisition, Management and Analytics)
- Telecommunication Systems and IOT Smart Sensor Devices
- Security & Surveillance Integrated Systems - Stabilized Pan-tilt Systems
- Ammunition Subsystems and Fuzes (Artillery, Mortar, UAV)
- Communication Jamming & Data Collection systems

We believe in innovative ideas and values which are the key components of our corporate culture, aiming for new concepts and methods of design and production that add value to our range of activities. Operating with state-of-the-art processes, highly qualified personnel and a strong team of engineers with extended experience in research & development projects, we offer the following high-performance services and capabilities:

- Design, production and support of electronic and mechanical systems.
- Design, development and installation of integrated hardware, software and specialized applications.
- System integration and testing of complex mechatronic devices.

## PROFILE

Heron Engineering LLC is a privately owned company based in Athens, Greece, which provides engineering services in the field of structural analysis.

We design, model and simulate a mechanical structure either metallic or composite, under given load condition and perform stress analysis in order to verify its integrity.

Our experienced engineers with expertise in Computational Structural Mechanics, have in-depth knowledge of structural analysis, both analytical and FEA, ensure the validity of our services.

We collaborate closely with our partners to design products according to given specifications (B2S), covering the entire engineering development process from conceptual design to detailed design and up to certification reports. Our mission is to assist in the development of high-end products via adequate design and analysis.

Heron Engineering LLC uses the most up to date and advanced software in our technology domain both for the design phase (CAD) and for the simulation (CAE).

## ACTIVITIES & PRODUCTS

Heron Engineering LLC core activity is the stress analysis of mechanical structures using the Finite Element Method, or analytical methods when is possible.

In terms of structures we can design and model:

- Metallic structures
- Composite structures

We perform the following analysis (list not exhaustive):

- Linear static
- Non- Linear static
- Buckling
- Dynamic (modal, transient, frequency response, random) analysis
- Thermomechanical
- Thermal (steady state and transient thermal) analysis
- Optimization
- Test Correlation (Interpretation of the results, correlation between simulation and test results, validation of the simulation process)

During the design process we provide:

- Conceptual and detailed 3D CAD models of the parts
- Conceptual and detailed 3D CAD models of an assembly structure e.g Ground Support Equipment (GSE)
- 2D specification drawings of single part or assembly along with the BOM table, ready for manufacturing.

## PROFILE

HYDRUS Engineering S.A. is a Greek engineering firm founded in December 2009 that specializes in providing comprehensive shipbuilding studies and technical services to customers in the shipping and energy sectors worldwide.

HYDRUS's activities span the entire spectrum of shipbuilding programs and initiatives. In the ocean shipping sector, the company commands a significant portion of the Greek market, managing approximately 35% of new construction projects and it is heavily involved in ship retrofitting, repairs, and consulting services, boasting over 3,000 successfully completed projects. The company participates in various European Union-funded projects aimed at developing and implementing innovative solutions.

In the defence sector, HYDRUS demonstrates its versatility and capability by engaging in shipbuilding studies, ship systems design, and performing retrofits and support programs. A notable highlight is the company's involvement in the European Corvette program call 1/2.

HYDRUS actively invests in the development of cutting-edge technologies following international and military quality standards.

## ACTIVITIES & PRODUCTS

Our new building division  
Services that may be offered include:

- project management
- design evaluation and benchmarking
- shipyard appraisal
- contract specification review
- contract negotiations
- vendors appraisal
- plan approval prior to construction
- supervision during construction
- shop tests and sea trials attendance guarantee claims handling

Our technical division  
Services that may include:

- Software Development
- 3D laser scanning
- ship and system design
- integration design
- engineering consultancy through the process of:
  - design requirements
  - techno-economic feasibility
  - concept design
  - basic design
  - detailed design
  - production design specification (material take-off lists)

## PROFILE

### Overview:

IDE is a highly acclaimed international Defence Systems company, designing and manufacturing advanced defence products in the areas of Missile Electronics, Tactical IP Communications, Vehicle C4I Systems, Surveillance, Hybrid Electric Power Systems, and Unmanned Systems, strategically positioned as a high performance and cost efficient manufacturer and services provider.

### The company:

- Focuses primarily on the armament programs of Defence Ministries and NATO
- Participates in a variety of major international defence programs since 1992
- Collaborates with world-class companies across the globe
- Demonstrates significant international activity with over 74% of annual turnover exports
- Is committed to providing solid values and ethics to its customers towards innovation, creativity, receptiveness

### Vision:

Building on established foundations we set new targets as we approach new challenges, with a development strategy based on three principles:

- Further expansion of our international business activities
- Continuous development of our exceptional personnel
- Leveraging our strategic alliances with leading defence companies

## ACTIVITIES & PRODUCTS

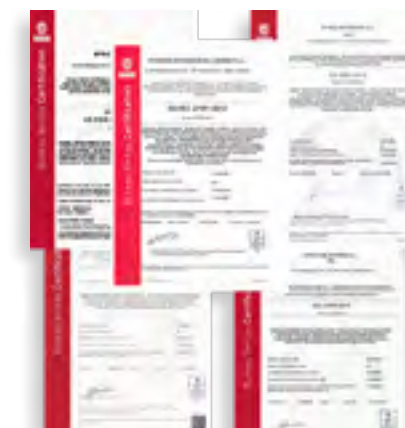

IDE provides tactical Communication and Information Systems in land and naval platforms for short, medium, long range, fixed or mobile applications, ranging from Wideband Radio to Intercommunication Systems, and integrated vehicle C4I solutions.

IDEs' Hybrid Power Systems combine conventional and renewable energy sources with advanced energy storage banks, under the supervision of a smart Power Management and Environmental Control Platform. These systems offer superior performance, fuel savings and low life-cycle costs.

IDE provides integrated Land and Maritime Surveillance Systems towards critical infrastructure protection and border surveillance, also incorporating the use of tactical unmanned aerial and surface systems.

IDE innovates in Data Links and Telemetries' design, development, qualification and production, based on field-proven expertise by implementing modern waveforms and protocols with extended embedded software control.

IDE established a strong industrial partnership and know-how, participating in International Programs for the co-production of Airborne & Land Electronics, Air Defence, Missile and Naval Systems.

## PROFILE

iKnowHow Group (IKH) is a well-established Greek technology firm based in Athens, holding a significant market share in the traditional ICT as well as in the Robotics & Automation sectors in Greece and Europe.

Founded in 2002, for two decades now the company is successfully delivering a wide range of tailor-made software solutions and specialized ICT strategy services as well as the building of complex enterprise applications, with an emphasis on Border & HLS Solutions, Digital Transformation, Information Security, e-Health and Robotics / Industrial Automation solutions.

Today, the IKH Group is employing more than 230 Engineers and IT professionals, holds under management more than 60 projects, for International & Greek private and public institutions, local subsidiaries of international organisations, as well as the EU Institutions and National Authorities, achieving more than 18m turnover and is considered among the most trusted companies in the field, repeatedly having been recognized by its clients and Strategic Partners for providing innovative solutions and extraordinary support.

## ACTIVITIES & PRODUCTS

## PROFILE

Internaftiki was founded in 1975 near the port of Piraeus. Since its foundation, the company has expanded rapidly in the field of marine and industrial products, offering also an entire range of service activities on ships and yacht machinery. It has moved to privately new headquarters in the heart of Piraeus main port since 2011, with modern workshop and warehouse facilities. Internaftiki offers product solutions for the New Building Sector, as well as After Sales, Service and Spare Parts support.

With essentially 49 years in operation, the company's ability to deal with various customers' needs has established it as a highly reputable enterprise in the marine and shipping sector.

## ACTIVITIES & PRODUCTS

Internaftiki offers a full combination of highly distinctive products intended for industrial and marine use by Ships, Yachts, Marinas and Yards.

Our core product assortment consists of the following:

- Engine Room Equipment
- Safety & Deck Equipment
- Propulsion & Transmission Equipment
- Maneuvering & Control Equipment
- Navigation & Bridge Equipment
- Epoxy Repair Products
- Valves & Piping Equipment

Our service department is responsible for the installation, maintenance and repair of our products as necessary, executed by highly qualified personnel who hold exceptional knowledge and experience.

## PROFILE

Integrated Systems Development S.A. (ISD) is an independent organization developing Integrated Systems (IS) of guaranteed quality and performance.

The company works with system houses, software houses and integrated circuit manufacturers and acts as a broad based original electronic equipment developer and integrator.

Services provided range from software development for embedded and general-purpose platforms, to digital and analog / RF integrated circuit design.

Furthermore, ISD is heavily involved in systems design, digital signal processing for embedded/stand-alone applications, PCB design, harness design, PCB assembly, harness manufacturing and test, system assembly, integration and test.

## ACTIVITIES & PRODUCTS

ISD's key activities include:

- System design (requirements analysis, system specification, s/w - h/w partitioning)
- ASIC design (digital, analogue and mixed signal for commercial and rad hard technologies)
- FPGA design (Intel FPGA design partner)
- SW and Embedded SW development (consumer and avionic)
- Prototyping (using FPGAs / accelerators)
- PCB design (commercial, avionic and space)
- SW validation (consumer, avionic and space)
- System validation (EVKs, test campaigns)
- Assembly, Integration and Testing Support for avionic and space equipment.
- High end PCB population and testing
- Harness manufacturing for avionic and space applications

ISD's key products range include:

- Vision systems for security applications
- Video processing sub-systems for flight simulators
- Structural Health Monitoring (SHM) for avionic and naval deployment
- Radiation hardened digital and mixed signal ASICs
- Hardened systems for aerospace and defence applications including harnesses
- Electronic system manufacturing capabilities

## PROFILE

KLEEMANN is a Greek multinational company manufacturing and trading mechanical constructions and one of the leading elevator manufacturers in the European and global market. The company specializes on unique constructions, platforms, mechanical equipment and parts, with a wide experience in high demanding projects in terms of load, durability and specifications.

With production facilities in Greece, Serbia and in China, as well as an assembly center in Turkey, KLEEMANN responds to the needs of the global market providing the KLEEMANN products to more than 100 countries. Its wide sales network is further reinforced with local presence in key markets such as Germany, the UK, Australia, Romania and France among others.

Dedicated to providing reliable and quality certified products and services, KLEEMANN has been one of the first companies in Greece to develop a quality management system. Every step of the production procedures is being controlled by a thorough system that safeguards quality and high performance of KLEEMANN products.

## ACTIVITIES & PRODUCTS

Among the KLEEMANN most popular product solutions are special mechanical constructions and parts, heavy load platforms, vandal resistant lifts, firefighter's lifts, earthquake lifts, super sized hydraulic (up to 20<sup>th</sup> rated load) and traction lifts, car lifts, rotated platforms, scissor lifts, explosion proof and high enduring extra protective lifting equipment.

KLEEMANN products are designed and manufactured to apply in any special project specifications giving solutions for extreme weather and temperature conditions, heavy loads, challenging terrains and space restrictions.

## PROFILE

KNDS HELLAS SINGLE MEMBER S.A. founded 2001 as a wholly owned Greek subsidiary KNDS DEUTCHLAND GmbH & Co. KG., Europe's leading supplier for military vehicles, has expanded on its own commitment in Greece while paving the way for a successful conclusion of LEO2HEL project, while Greek Army ordered 170 LEOPARD 2HEL vehicles.

Turning to advantage the Know-how and the experience from the co-operation in LEO 2HEL project and the state-of-the-art infrastructure we supply a wide range of services.

After the LEO 2HEL project the company has been involved in many other foreign KNDS DEUTCHLAND GmbH & Co. KG. programs, with component and component groups for vehicles as FENNEK, DINGO, BOXER, PzH and PUMA.

Last years KNDS HELLAS SINGLE MEMBER S.A. was participated LEO 2A7 + project for QATAR and now is participating in LEO 2A7 project for Hungary and the upgrading programs for LEO 2A4 and 2A5 to LEO 2A7 for the German and Danish armies.

Company is certified for Special Processes from RAYTHEON (USA) and is manufacturing various parts for PATRIOT missile systems.

KNDS HELLAS SINGLE MEMBER S.A. is:

- Certified for Facilities Security Clearance from the Hellenic MOD to a NATO-SECRET degree
- Registered in the Registry of Domestic Defence Material Manufacturers of the Hellenic MOD
- A member of:
  - Hellenic Aerospace & Defence Industries Group (HASDIG)
  - Hellenic Defence Material and Security Association (SEKPY)
  - Greek-German Chamber (DGIHK)
  - Arab-Hellenic Chamber of Commerce and Development (AHCCD)

## ACTIVITIES & PRODUCTS

- Manufacturing and assembly of components, component groups and Special Tools for General Industrial and Defence Applications
- Design and Development of Production Jigsand Fixtures
- Precise mechanical machining, Welding of Special Steels, Painting
- Manufacturing and assembly of Protection Kits, Assembly of Electromechanical Subsystems
- Refurbishment of Components and Component Groups
- Field Customer Service and Spare Parts supply for Military Vehicles and Defence Systems, with:
  - Engine maintenance.
  - Maintenance and repair of wheel arm elbows and Hydraulic units
  - Maintenance, repair and upgrade of critical chassis subassemblies.
  - Replenishment and maintenance of firefighting bottles.

## PROFILE

Lambda Automata, is a defence technology company specializing in autonomous surveillance and situational awareness systems. We work to protect the security and prosperity of the one billion people residing in European democracies and allied nations, by building software and hardware to counter the growing threat of unmanned fleets from revisionist powers.

Using the latest developments in artificial intelligence, Delian AI develops autonomous large-area surveillance systems that scan areas of interest while detecting, tracking, and classifying targets autonomously.

Our technology can integrate with existing systems for both military and civil applications, from dense urban areas to remote wilderness. Each system is portable, quick to assemble, and uses commercial off-the-shelf parts, ensuring versatility and rapid deployment in various scenarios.

## ACTIVITIES & PRODUCTS

All our products are designed with the same core principles:

- Minimal maintenance
- Ease of transport and assembly
- Use of commercial off the shelf parts
- Components sourced from allied nations

LAST - Delian Autonomous Surveillance Tower comprises an integrated system equipped with state-of-the-art sensor technologies, energy supply systems, and communication units.

MPLAST - Man Portable LAST is a compact portable version of the surveillance tower. Key features include fast deployment, long autonomy, remote supervision & passive target coordinates acquisition.

JERICO is a high bandwidth communication system with dual GSM and satellite connectivity. It interconnects and fuses the feed of portable devices, such as drones, cameras and other sensors.

All our products share a common perception and autonomy suite, StrikeWeb, which:

- Fuses data across the optical, thermal, radar and RF spectrum
- Integrates with legacy platforms and sensors
- Allows frequent update cycles across the fleet
- Combines offline and online information sources

## PROFILE

MENGIA S.A. is a modern manufacturing company specialising in engineering applications for the automotive, industrial, military, mass transportation and naval sectors.

It designs, develops, manufactures and distributes quality parts, components and systems for all types of engines, industrial equipment and machinery, as well as spare parts for naval applications and military equipment and vehicles.

The products distributed by MENGIA S.A. in the Greek market are of its own design and production.

With offices in Athens & Thessaloniki, its clientele consists of organizations, companies and factories throughout Greece and neighboring countries.

## ACTIVITIES & PRODUCTS

### GENERAL ENGINEERING SERVICES

- REVERSE ENGINEERING
- CAD/CAM
- 3D PRINTING
- 3D SCANNING (Model Creation and Accurate Measurements)
- ENGINEERING SIMULATIONS
- PROTOTYPING (Production of Prototypes)
- CNC MACHINING

## PROFILE

METKA | VOLOS INDUSTRY, is a global leader in Industrial Manufacturing whose industrial activities focus on the manufacturing for high-value added heavy and/or complex steel fabrications for energy and defence applications, involving the use of the company's computer-controlled machining equipment and high-quality fabrication capabilities.

Several major contracts have been undertaken by METKA | VOLOS INDUSTRY in the defence sector, including the co-production of the Leopard Main Battle Tank and manufacture of pressure hulls for the latest generation of submarines. The company is currently carrying out numerous separate contracts to manufacture and export vehicles, launchers and major assemblies of Patriot defence systems for international customers.

Recently METKA | VOLOS INDUSTRY started Cooperation with NAVAL GROUP related to Belharra Frigates components. METKA | VOLOS INDUSTRY employs 320 persons at its two Plants in Central Greece, occupying an area of 19 hectares.

Production of steel equipment, sections' structure engineering, sand blasting and painting, cutting, formation and tracing of plates, machining, welding, assembly and testing belong to METKA's main activities.

Combining long manufacturing experience, well-qualified personnel and highly accurate automated machinery, the plants meet demanding tolerance standards and the highest quality levels.

Due to the recent geopolitical events in Central Europe the demand for METKA's products has been dramatically increased. Due to that METKA/METLEN S.A. is realizing a new investment by manufacturing a second factory in Volos industrial Area.

METKA's manufacturing plant is one of the leading facilities of its kind in Europe.

METKA | VOLOS INDUSTRY, is a member of METLEN ENERGY & METALS S.A., one of Greece's leading industrial companies, with activities in Metallurgy, SES, Industrial Manufacturing, Electric Power and Gas Trading.

## ACTIVITIES & PRODUCTS

The company has extended manufacturing experience in the areas of land defence systems and submarines, i.e.:

- Main Battle Tanks - hulls, turrets and ancillary mechanical equipment,
- Armored Tracked Vehicles - hulls and ancillary mechanical equipment,
- Submarines - pressure hulls and penetrations,
- Submarines - weapon loading systems,
- Missile air defence systems - semi trailers and launcher platforms
- Belharra Frigates integrated Systems

## PROFILE

MEVACO, being a member of the Athens stock exchange is a leading manufacturing firm which implements state-of-the-art technology in the field of metal fabrication and metal construction, conforming to the principle that total customer satisfaction is of highest priority.

When it comes to sheet metal fabrication processes, whether carbon steel, stainless steel or aluminum, MEVACO, having experience in the field for over 50 years strives to be the industry leader. Our customers depend on us to produce high quality and high precision custom products. Our staff of highly trained and engineers and technicians are flexible and highly motivated.

Our state-of-the-art metal fabrication equipment and sophisticated manufacturing technologies coupled with an abundant industrial floor space enable us to fabricate almost any type and size of metal product, strictly based on the customers quality and quantity requirements.

Mevaco not only invests in fabrication technologies and machinery but firmly believes our success stems from the philosophy of personnel investment. Our self-motivated experienced and energetic staff adjusts to almost any degree of difficulty and can yield desired results within a minimum response time. We make the best use of leading edge computerized hardware and software and our staff is constantly trained and up to date with emerging technologies within the field. We can fabricate to almost any order quantity and to any quality level as desired by the customer.

We keep our equipment up-to-date and our staff trained and highly-motivated and content, this we believe is what sets Mevaco as a leader in metal fabrication and metal construction.

## ACTIVITIES & PRODUCTS

- Sheet metalwork fabrications to customer specification (cutting services, laser cutting services, punching services, forming services, bending services, roll forming services, welding services, painting services, screen printing services) for household electric appliances, beverage coolers, central heating boilers, indoor and outdoor advertising, promotion racks and stands, vehicles, electric and electronic boards, telecommunication boards, banking services, etc.
- Structural light and medium weight metal fabrications to customer specification for tunnels, bus stations, tram stations, prefabricated buildings as well as a big variety of welded metal fabrications.
- Electronic boards for sports fields.
- Structural supports and for photovoltaic installations and truckers.
- Architectural building façades.
- Military hardware welded applications built to print. The Defence Department of Mevaco is considered an upmost specialized unit dealing with products which require both strict specifications and quality standards (Military standards).

Some of the qualifications - approvals granted by Raytheon Company to Mevaco for the execution of defence related products are for the following processes:

- Fusion Welding per AWS D17.1 & WS33739 & AWS D1.2 & WS33739 Appx.2
- Spot Welding approval according to AWS D17.2
- Penetrant Inspection approval according to ASTM-E-1417, Type I, method C
- Magnetic Particle Inspection approval according to ASTM-E-1444
- Painting (CARC- Chemical Agent Resistance Coating) according to MIS-20007
- Conductive Painting according to MIS-41252

For abovementioned processes, Mevaco is included in the Approved Source catalogue of Raytheon Company.

## PROFILE

MILTECH HELLAS S.A. is one of the leading Hellenic companies in the defence sector specializing in design and manufacture of high quality cost effective electronic products for defence applications.

The company was established in 1997 and since then it has collaborated with both local and foreign companies in technology upgrade and exchange, programs, along with co-production of defence equipment and systems, either directly or through subcontracting for the Hellenic Armed Forces.

Our area of expertise includes design, development and production of leading edge technology aerospace electronics, communication and avionic products, thermal surveillance systems, equipment and harnesses.

We are located 20 km east of Athens near the Athens International Airport and close to main highway intersections.

## ACTIVITIES & PRODUCTS

The main activities of MILTECH HELLAS S.A. cover:

- Design and development of technology edge electronic products and systems in-house or using specialized design tools.
- Production. Automatic PCB assembly of discrete components and SMD technology, Aircraft Harnesses (Laser-marking, Over braiding, Testing) Soldering, using robotic SMD assembly line, wave jet, Production and Final integration of electro-mechanical and electro-optical products.
- Testing. Environmental testing according to International standards and conformance testing to customer or special product requirements.

The company has an active research and development department on which many defence products have been developed and are used today in armies around the world.

The products that the company is manufacturing are electronic systems, electrical harnesses and avionics, aircraft electrical components, converters and radio accessories, thermal surveillance systems & cameras, weapon system components, CNC mechanical parts.

## PROFILE

MKK TECHNIKI PC is a Greek Company established in 2015.

MKK TECHNIKI PC division are:

- Study and design of public and private projects in general and specifically in the fields of Defence, Security and Energy.
- Assembly - integration, construction - installation and then support - maintenance of public and private projects in general, with delivery in full operation and especially in the fields of Defence, Security and Energy.
- Research and development of materials and assembly - manufacturing techniques.
- Supply of materials and systems, in full operation.
- Provision of advisory legal - financial and technical advice, with preparation of a corresponding study if required.
- Project management.
- Facility management, buildings, hangars, bunkers, and green spaces.

In defence activities, MKK TECHNIKI PC study, design, assemble - build and support constructions in relation to hangars, bunkers, special buildings of military installations as well as airport taxiway, radar, air navigation, radio - communication and security systems, as turnkey solutions projects.

## PROFILE

NanoPhos S.A., taking advantage of the latest materials-science achievements, develops and manufactures "intelligent" coatings for industrial, marine, and defence-related applications. The term "intelligent" coatings refer to a tangible benefit and a distinctive advantage or property beyond the protective or decorative character of a coating.

NanoPhos was founded in 2005 to transfer innovation from the lab to special coatings for the defence sector. It has been focused on research, development, production, and trading "intelligent" coatings - mainly paint formulations - seeking to create a more silent, durable, and high-performance operating environment. NanoPhos' vast scientific knowledge and rich product portfolio offer solutions in an innovative way.

Our vision is clear: "Tune the nanoworld to serve the macroworld" - in simple terms, make nanoparticles serve the needs of the defence industry. After identifying a technical challenge, we develop novel products that deliver a solution using nanotechnology. NanoPhos achieved more than ten international awards and maintains an intense Research and Development base. NanoPhos' products have also been certified according to international classification societies standards, like DNV, RINA, Bureau Veritas & ABS standards

## ACTIVITIES & PRODUCTS

NanoPhos has developed a wide range of antifouling self-polishing coating formulations for the needs of Navy vessels. Special fouling-release coatings that reduce friction, fuel consumption, and enhance range are also readily available. HelixPro is a propeller coating that promotes sound reduction, elimination of cavitations, and alteration.

For the last five years, NanoPhos has established a fruitful cooperation with the Hellenic Navy, offering specified solutions and products according to the needs and specifications of the Hellenic Navy.

Coatings with ballistic, anti-spall, abrasion, and/or corrosion resistance properties are readily available. As per NanoPhos proprietary technology, special coatings for suppressing or enhancing InfraRed signature have been developed to promote night vision camouflage or deception patterns. Super-hydrophilic lens coatings eliminate fogging.

## PROFILE

NAX was founded in 1957 by Nikolaos Axakalis, father of the current owners, and is now proudly in its third generation of family leadership. Initially focused on machining work of all kinds, the company quickly earned a reputation for excellence among clients and partners. Our success is built on three core principles:

- High Quality & Precision
- Reliability
- Consistency

These values, alongside our strict "Zero-Defect" policy, have positioned NAX at the forefront of machining shops, particularly in the demanding aerospace and defence sectors. Continuous investments in cutting-edge equipment and employee training have transformed us into a strong construction unit.

With over 20 years of collaboration with both Greek and international defence industries, we have developed extensive expertise and technical know-how that allow us to meet the highest industry standards.

## ACTIVITIES & PRODUCTS

We specialize in producing small to medium complex spare parts for mechanical and electronic applications, focusing on the defence industry and domestic market.

Our advanced 5-axis machining capabilities, powered by CAD/CAM/CAE software, utilize both CNC and conventional tools. Quality control, including CMM, is embedded in our process, ensuring products meet exact tolerances and customer expectations.

For the past nine years, we have collaborated closely with the Hellenic Navy, providing precision-machined parts and refurbishment services for Phalanx weapon systems.

Our work includes machining parts, maintaining - refurbishing for air compressors, pneumatic motors, pumps, structural components, design and manufacturing of custom tools and Jigs for their workshops.

Key defence projects:

- PHALANX: Parts and Refurbishes for the Hellenic Navy.
- Dassault nEUROn: Spare parts for H.A.I.
- FREMM: Electrical cabinet components for Thales.
- Anti-Submarine Sonars: spare parts for Hellenic Navy helicopters.
- Leopard HDVS: Spare parts for KMW Leopard vehicles.

PROFILE

OCEANKING is a leading marine engineering and commercial group serving the Greek and international maritime community and the Hellenic Armed Forces, emphasizing the Hellenic Navy.

Founded in 1989, it operates in Piraeus, Greece, employs qualified naval architects, marine engineers and logisticians, and follows strict quality procedures certified by Lloyds according to ISO 9001:2015.

Our expertise covers the areas of ship design, ship construction and operation, shipbuilding methods and management, marine engineering systems, materials supply, and Integrated Logistics Support services.

OCEANKING possesses considerable experience and involvement in the Naval sector by supplying, supporting, retrofitting, and maintaining the platform and electronic equipment for naval ships.

ACTIVITIES & PRODUCTS

OCEANKING group provides the following products and services:

- Equipment representatives and suppliers of marine systems for the engine room, deck/hull, electrical and electronics, accommodation, LNG cryogenic systems, and Eco Technologies.
- Program management and effective implementation of contracts in each project's design, integration, certification, and delivery.
- Integrated after-sales technical and support services, for spare parts, maintenance, repairs, and training.
- Integration of Electrification/Hybridization technologies for marine and onshore applications.
- For the Hellenic Navy programs, supply, installation, and complete logistics support services of specialized equipment, electronics & mission-related systems.
- Integrated support services to prime contractors such as:
  - Holistic project data and documentation handling
  - Engineering (and non-engineering) activities coordination
  - Progress control and reporting
  - Manpower loading
  - Quality Assurance Plan implementation
  - Planning and control of the shipbuilding process to meet cost targets
  - Execution and supervision of all the Integrated Logistics Support (ILS) tasks, while ensuring the supply chain security
- Dedicated Engineering services:
  - Quality Control procedures
  - Procedures and protocols for testing and validation
  - Supervision and guidance for installation
  - Services for setting to work and testing
  - HAT-SAT support with setting to work and testing

## PROFILE

OHb Hellas, a 100% subsidiary of the European Space and Technology Group OHb SE, launched operations in Greece in 2018. This development follows the signature of the MoU between the Greek State and OHb SE.

The establishment of OHb Hellas and is a key step in OHb Group's strategy to enhance Greece's space industry. Our mission as the first dedicated space system company in Greece is to enhance national space capabilities, foster strategic growth within the local space industry and research organisations, expand the OHb SE supply chain to Greece and support bilateral collaborations between Greece and Germany in the space domain.

OHb Hellas generates an opportunity for young motivated Greek engineers to work in the space industry in Greece. It intends to contribute to the return of highly educated Greek scientists, engineers and professionals in general, who are working abroad, back to Greece.

## ACTIVITIES & PRODUCTS

OHb Hellas collaborates with leading national and international companies and space agencies to leverage the expertise required for specialized projects. Building trustful partnerships and strategic alliances is essential for our success in large-scale initiatives.

Our primary focus is on innovation, particularly in high-performance data processing on board satellites. We are dedicated to advancing this field through cutting-edge technology development projects, ensuring that each project's objectives are met with excellence.

Operating across multiple sectors, OHb Hellas integrates advanced artificial intelligence and neuromorphic computing into satellites to enhance data processing capabilities. In aerospace manufacturing, we are advancing innovative techniques such as 3D printing and polymer metallization. Our efforts extend to improving satellite communication systems, thereby boosting connectivity and efficiency.

Additionally, OHb Hellas contributes to space debris tracking and mission monitoring systems, advancing space surveillance and operational oversight. Through these diverse activities, we are committed to driving forward innovation and excellence in space technology and communications.

## PROFILE

**ONEX Shipyards & Technologies Group (ONEX Group)** is one of the leading industrial and technology organisations in the Mediterranean region, with a significant footprint in strategic sectors and critical high-value infrastructures, such as shipyards, integrated energy transformation technologies/solutions, naval and commercial shipbuilding, defence applications, as well as investments in new technologies. Onex Group has been identified as the key contributor for the revival of the shipbuilding industry in Greece, by acquiring and rehabilitating two of the three largest shipyards in the country (Syros & Elefsis), establishing one of the largest shipbuilding groups in the region. Distinctive characteristic of ONEX Group since its establishment in 2004, is extroversion and innovation, which is confirmed by the establishment of the AEGEAN NEORION INNOVATION CENTER (ANIC) in Syros, that has been co-founded with the Region of South Aegean and CISCO, as technological partner.

### Defense Capabilities – Activities:

ONEX Group, being the largest shipyards in Greece and among the largest naval ecosystems in the Mediterranean, and having the capability to design and built almost any kind of manned and unmanned naval vessel up to the size of corvette (fast attack crafts, support and special vessels, OPVs) and submarines, along with the capability to accommodate and support at its facilities up to 25 ships simultaneously, constitutes the best partner not only for the Hellenic Navy, but also for the naval fleets of all Allied Nations, by providing solutions that can satisfy all naval technical and operational requirements, at a region of such a high geopolitical value. ONEX Group has many years of experience in being active in the fields of industrial production, supply, provision of maintenance & support services and integrated logistics solutions (ILS) for various defense material, missile and weapons parts, ammunition, aircraft parts/spares, military equipment, safety and security systems, surveillance equipment, chemicals, lubricants, constituting one of the largest industrial facilities for defense applications.

### General Information:

ONEX Group, which in 2024 celebrated the 20 years anniversary since its foundation, consists of several state-of-the-art companies, operating a diversified portfolio of activities, including ship building/repairing/retrofitting/conversion, offshore platforms/systems construction, railway vehicles & equipment maintenance, ICT/IoT, business process outsourcing, Integrated logistics Support (ILS) services for defense & security systems, nanotechnology, energy, real estate and more. The Group employs directly and indirectly more than 3,000 personnel and the value of the Shares and Assets under the Groups' management is approximately 300 million €. The total value of the projects that have been implemented and delivered by ONEX Group regarding the entire range of the Group's activities, exceeds 2 billion €, whilst, during the last 5 years the Group has successfully completed and delivered more than 200 programs. During the last 4 years, the Group's growth has been explosive, whilst since December 2019, when Syros & Elefsis Shipyards were reactivated under the ownership of ONEX Group, more than 560 ships of Greek and International ownership, have been repaired/serviced/maintained/retrofitted in these two yards, highly upgrading the international footprint of Greece in the maritime industry.

ONEX Group's total investments in Greece exceed 650 million € and taking into account the additional investments that have been planned by the Group, it is estimated that by the end of 2030, the total value of the Group's investments, will reach 1 billion €. ONEX Group's success stems from consistently applying supreme innovation and operational excellence at the most competitive cost and delivery times, thus constituting a valuable partner and an emerging leader in the Eastern Mediterranean and beyond.

### Establishment - Ownership:

The first company of ONEX Group was founded in October 2004 by the entrepreneur Panos Xenokostas, who is also the owner of ONEX Shipyards & Technologies Group and the President of the Greek Shipyards Association (EEN).

## ACTIVITIES & PRODUCTS

Our major activities include:

- Ship building of all types of littoral or blue navy warships, commercial and recreation vessels - NATO certified shipyard services for all naval platforms (manned or unmanned), ship repair, maintenance, upgrades and conversions.
- Shipping systems and equipment.
- Maritime digital training and innovation technologies.
- Maritime, Port and Border surveillance solutions and system integration. Critical Infrastructure Security (C4ISR) - Border Control - Cyber Security.
- ICT: Smart Cities - Data Analytics & Integration - Blockchain - Precision Agriculture - Telemedicine.
- Aviation: MRO - FAA repair stations - OEM repair stations - New OEM A/C - HC - Spare Parts - Chemicals - Lubricants - Structural Parts Assembly - Retrofits.
- Energy platforms, offshore platforms, energy pipelines, ship drills, support, repairs, conversion.
- Business process outsourcing - Digitization, IT Support, Asset Management - Logistics Support.
- Software applications development.
- Weapon Systems, Arms & Ammunition production, maintenance, support & supply.
- Military garment & equipment.
- Unmanned Systems.
- Other commercial, military and security activities.

## PROFILE

PASS DEFENCE Ltd. is a 100% Hellenic company, exclusive representative in Greece of many manufacturing companies of defence, security and CBRN materials. The staff of PASS DEFENCE is fully trained to provide accurate training about the operation, application and support of their products.

Having long term experience on the qualitative design and support of products and services, PASS DEFENCE Ltd. offers to the NATO, Hellenic & Cyprus Armed Forces, Police, Security services, Embassies and Private organizations the following:

- Defence systems.
- Demining - Ammunition collection and disposal.
- Security systems for personnel and facilities.
- Consulting services concerning defence and security.
- Space control assuring secure communication.
- CBRN detection and protection - decontamination material.
- Repair Services for Military PCBs

For supporting this effort and respond to the evolutions of modern technology, our company continuously trains its employees in Greece and abroad.

## ACTIVITIES & PRODUCTS

PASS DEFENCE covers a wide range of provided technology, products and services activities by developing the human potential, the experience and the know-how, we have received after the successful completion of more than 700 contracts. We offer integrated solutions, high technology services, research elaborations, material and system sales, certified training and full after sales support.

In our capabilities are included:

- Radar spares
- Military & obsolete systems spares
- Aviation support equipment & services
- CBRN protection equipment
- Color marking training ammunition
- Military training equipment
- EOD/IEDD equipment, including ROVs
- Security search equipment
- Diagnostic solutions for electronics
- Secure communications equipment
- Repair Services for Military PCBs

## PROFILE

PRISMA ELECTRONICS is a high-tech Electronics manufacturing & ICT systems developer and integrator company with over 30 years' experience in Aerospace & Defence, Space Applications, Maritime, Critical Infrastructures, Energy & Environment and cutting edge R&D.

Prisma operates one of the most advanced Electronics manufacturing and harnessing facilities in Greece working as subcontractor for many well know Defence Companies. Prisma offers services in PCB and cables design, manufacturing, assembly and integration; it also provides expertise in complex harness design for defence and space applications, assembly and testing, system integration and test aid device manufacturing.

In Parallel Prisma has its own technology (IP) and products regarding AI Data Driven Decisions based on IoT and advanced analytics for knowledge available from sensors and humans. Remote Real-time Condition Monitoring from any Analog and Digital Sensor allowing improved efficiency of Operations and Performance Optimization technology under the name PRISMASENSE™. Through this technology, PRISMA has developed in-house cutting-edge expertise around IoT, AI, Machine Learning, Big Data analysis, Data Fusion on Digital Twins and Augmented Reality.

PRISMA ELECTRONICS is a knowledgeable and reliable Technology partner that can undertake complex development and production work and provide low risk/high value services to its clients at an international level.

## ACTIVITIES & PRODUCTS

- Design, Development, Integration and Support of Telematics, Wired & Wireless Networks
- Design, Production, Installation and Support / Training of Remote Real-time Condition Monitoring and Performance Optimization Decision Support Systems for Maritime, Aerospace & Defence, Energy and Critical Infrastructure applications
- Design, Production of Printed Circuit Boards, Wiring and Devices
- Design and production of complex wire harnesses assemblies for Defence and Space applications
- Project Management of Defence Material and Research Programs
- PC Assembly, Marketing & Technical Support of Information, Communications and Office

### Automation Products

- ICT Systems Design & Integration, Internet & Web Development Applications Services
- Data Privacy and information security management services

## PROFILE

Raycap is an international manufacturer and technology leader with decades of experience providing innovative infrastructure solutions for customers in the telecom, energy, defence, transportation, and other industrial markets.

Its solutions protect mission-critical applications and ensure the best possible system availability.

Since its founding in 1987, the company has experienced continuous growth. Its engineering expertise, test laboratories, and multiple manufacturing facilities guarantee quality, reliability, and innovation. Product design, testing, and approval processes comply with all international safety standards.

Raycap operates in Greece, the United States, Germany, Cyprus, Slovenia, France, Romania, and China.

For more information on Raycap products, visit [www.raycap.com](http://www.raycap.com).

## ACTIVITIES & PRODUCTS

The company's product portfolio includes:

- lightning and surge protection technologies,
- structured cabling and connectivity solutions,
- power management systems,
- custom enclosures,
- cabinets and
- wireless network concealments.

## PROFILE

Raymetrics, the leading atmospheric LIDAR manufacturer, offers a range of advanced products and services catering to various sectors including aviation, meteorology, environmental monitoring, space and defence.

With over 20 years of experience and a global clientele, Raymetrics stands out for its expertise and innovation in the field.

Among the variety of measurement techniques, ground-based remote sensing systems, provide regionally representative information of upmost importance, covering the full atmospheric column with range-resolved information. When compared to the surface in situ techniques, ground-based remote sensing is advantageous in terms of representativeness, especially on the domains of satellite Cal/Val and data assimilation in Earth System Models.

The use of lidar technique to monitor remotely the atmospheric characteristics has numerous potential applications.

Raymetrics has developed cutting-edge lidar systems with extensive applications in defence. These systems are adept at detecting various chemical and biological agents, as well as broader CBRN (Chemical, Biological, Radiological, Nuclear) threats.

Leveraging the laser-induced fluorescence technique, Raymetrics lidar systems can precisely identify and analyze hazardous substances, offering critical insights for defence and security operations.

## ACTIVITIES & PRODUCTS

Raymetrics S.A. is a global leader in atmospheric LiDAR manufacturing.

The Company mainly serves the meteorology, aviation, mining, military and academia and research sectors with a total installed base of around 80 systems.

The product portfolio comprises Standardised Vertical Profiling- and Standardised 3D-Scanning LiDARs with the ability to combine new technology with existing systems such as RADAR.

In addition, Raymetrics offers customisation for all its LiDAR-systems as well as installation, systems integration, maintenance services and training for new and existing customers.

## PROFILE

SAFEDOOR, a manufacturing and importing company, has been studying, developing and manufacturing bullet proof protection, fire protection, radiation protection, security and sound insulation doors since 1988.

It has a certified ISO 9001 quality system, EPD certificate and more than 50 proprietary certificates in accordance with the European Regulations.

In 2017 they received HONORARY DISTINCTION OF INDUSTRIAL EXCELLENCE at the "MADE IN GREECE" awards among the productive enterprises of Greece.

It has studied and manufactured the 1st bulletproof roller in the world, class FB6 and has already installed a large number of them in high security buildings and VIP areas. It has also manufactured certified bulletproof doors, glazing and anti-vandal rolling shutters.

It has provided the European Center for Nuclear Research (CERN) in Switzerland, all the special fire barriers of the underground tunnel of the LCH and SPS accelerator and still going.

## ACTIVITIES & PRODUCTS

### Bullet Proof Protection

- Bullet Proof Doors FB6
- Bullet Proof Rolling Shutters FB5 and FB6
- Bullet Proof Glazing FB6

### Fire Protection

- Fire Protection Doors
- Fire Protection Rolling Shutters
- Fire Curtains
- Fire Glazing
- Passive Fire Protection Seals

### Radiation Protection

- High Radiation Protection Doors
- Metal Radiation Protection Doors
- Radiation Protection Window
- Hot Cell
- Shielded Radioisotop Waste Bins
- Radioisotop Storage Crypt

### Security

- Anti-Vandal Safety Rolling Shutter
- Armored Security Doors
- Common or Industrial Type Safety Rolling Shutter
- Glazing and Security Windows

### Sound Insulation

- Sound Insulating Doors 54, 40 and 35 DB

### Special Specifications

- Wind Load Doors
- Floor Fire Protection Manholes

## PROFILE

SAS Technology, a valuable member of the Spirit World Group, is a distinguished manufacturer of Unmanned Aerial Systems (UAS). Established in 2020, SAS is the first and only Greek company to successfully design, manufacture and test weaponized drones with aerial firing trials. Originating from a research and development team with experience in unmanned systems since 2015, SAS has swiftly become a key player in the defence sector.

The company's strength lies in integrating advanced weapon systems and innovative custom designs into its UAS, offering rapid prototyping and tailored solutions, which have earned it international recognition. SAS ensures compliance with HNMAA, EASA and international regulations through its in-house airworthiness department.

With a vision to drive innovation and expand globally, SAS has built a strong network of strategic partnerships, pushing the boundaries of the rapidly evolving unmanned systems industry.

## ACTIVITIES & PRODUCTS

SAS Technology offers a diverse product range, from fixed-wing Medium Altitude Long Endurance (MALE) UAS prototypes with a 200kg Maximum Take-Off Weight (MTOW) to heavy/medium multi-copter systems ranging from 6kg to over 60kg. This versatility enables SAS's systems to adapt to a wide array of civil and military missions.

Over the past four years, SAS has developed more than 10 series of UAS and related support equipment, with its flagship, SARISA, being the first armed drone created in Greece. SARISA's weaponized versions feature various payload racks for hand grenade release, RPG firing and a 2.75" rocket firing capability, successfully tested and certified with Thales BE.

Among its offerings, SAS provides the AIHMI SOLM, a loitering munition with stand-off capability to launch a 2.75" LASER Guided Rocket, featuring auto-flight to a GPS-designated target and man-in-the-loop firing. Additionally, the ARES medium-weight UAV series, advanced ground stations and specialized underwater drone controllers offer robust and comprehensive solutions for extended operational autonomy.

## PROFILE

SATWAYS Ltd. is a privately held organization founded in May 2006, based in Athens, Greece with annexes in Patras and Larissa, Volos and presence in Germany. The company's main activity is the development of integrated Geospatial Command and Control solutions for Security, Public Safety and Defense.

Satways' product range includes C2 and C3I software packages that meet specialized operational requirements of Defense & Public Security Organizations, such as distributed geospatial data management, operational resource monitoring, incident management and action routing, information management physical security, crisis management of natural & technological disasters, as well as integrated security management and operations of critical infrastructure and borders. Their common goal is to provide effective decision-making support during operations by providing a common operational picture, current situational awareness, the use of modern cooperation tools, the collection – exploitation of field data and the coordination of actions of intervention units and operational users.

## ACTIVITIES & PRODUCTS

Our expertise lies in delivering end-to-end integrated solutions, in implementing large scale turn-key projects and in providing a wide range of engineering professional services. Our competitive advantage is based on our experience to deliver Nation-wide mission critical civil security and safety projects. Satways product line includes integrated solutions for the following vertical markets:

- Incident and Dispatch for First Responders
- Border Surveillance and Coordination
- Smart Cities Coordination – Digital Twins
- Defence
- Critical Infrastructure Protection
- Civil Protection Solutions

Satways' flagship product is ENGAGE C3I software platform with a unique modular architecture that permits easy customization to meet exact user requirements, easily increase capabilities of deployed solutions by adding additional modules and everything is available through a single unified end-user interface. It can be installed in fixed and deployable command centers and can also be accessed in the field via mobile data terminals. Their common goal is to make efficient use of available resources, to provide effective decision support, to simplify operations, to provide a Common Operational Picture (COP), Situation Awareness and collaboration tools across organizations, to collect and disseminate data in the field and to coordinate response units and system users.

In addition, Satways is developing seismic and acoustic sensor based real time acquisition and analysis systems for various applications in the areas of geophysics, seismology and earthquake engineering, as well as in border security and defense. More specifically in the defense sector, Satways is developing passive sensing systems (both hardware and software algorithms for detection, classification and tracking of targets in land and sea by using a variety of sensors such as geophones, hydrophones and fiber optic cables (Distributed Acoustic Sensing).

### PROFILE

SCYTALYS S.A. is a leading Defence Software Development and Integration company, founded in 1993 in Greece, specializing in design, development, installation, and testing. Scytalys employs 110 people in total, the majority of them being engineers and experts in their field. It has offices across 3 international regions (Greece, UAE, Singapore) to serve its customers in 18 countries worldwide.

The company has an outstanding record of participation in domestic programs supporting Hellenic forces, and through its long history of engineering innovation, reliability, efficiency, and quality of service, has managed to become the preferred partner of multinational companies and organizations in the Aerospace, Defence and Security sectors, providing quality-driven solutions.

SCYTALYS has also leveraged its global presence building on proven capabilities and products, responding to modern technological challenges, and achieving the delivery of complex software systems based on customer-specific requirements. The company's R&D and production of innovative technologies enable customers to achieve Interoperability, improving communication, enhancing Situational Awareness and Domain Supremacy, thereby creating an effective Network-Centric Warfare environment.

In addition, the company utilizes high-end and field-proven technologies in the design and development of advanced product solutions in the areas of:

- Tactical Data Links,
- Mission and Tactical Command & Control Systems,
- C4I Systems,
- Training,
- Testing
- Surveillance & Reconnaissance.

### ACTIVITIES & PRODUCTS

The company continuously revolutionizes through its two main product lines;

- The MIMS (Mission Information & Management System) family of Multi-Domain Mission Systems and
- The ULS (Universal Link System) Multi Data Link Processor (MDLP) for all NATO standardized and national data link protocols.

## PROFILE

Seeders is a distinguished technology, software, and consulting firm headquartered in Athens, recognized for its evolution into a leading provider of Technology and Business Transformation services.

The company operates through four specialized divisions:

- Seeders Talent,
- Seeders Tech,
- Seeders Venture Studio, and
- European Defence Venture Studio (EDVS).

Seeders Defence team members hold top-tier qualifications from prestigious academic and military institutions such as MIT, Harvard, the Naval Postgraduate School (NPS), and NATO Defence College. Seeders team possesses precious expertise both in staff and field roles, acquired through their service in the Hellenic Armed Forces and in various international organizations and missions.

Leveraging this deep tech knowledge and experience, Seeders consistently delivers customized, high-quality solutions with precision and efficiency. This unique blend of expertise, entrepreneurial spirit, and extensive field experience positions Seeders at the forefront of Defence Innovation, empowering the firm to provide cutting-edge technology solutions, strategic consultancy, and bespoke services to the defence sector.

business entrepreneurship  
defense innovation

## ACTIVITIES & PRODUCTS

Seeders is offering advanced defence solutions, through a range of services designed to meet the evolving needs of the defence sector. The Seeders Defence division provides expertise in systems integration, communication systems, and IT services tailored to defence applications and utilization of emerging disruptive technologies.

Seeders Defence is also working on the development and deployment of unmanned systems, offering both hardware and software solutions. Additionally, we support electronic warfare initiatives and provide consulting services that span from strategy development to technical implementation.

Seeders Talent unique platform SkillsCharts®, is offering tailored personnel hiring and training services, ensuring defence organizations are equipped with the best talent. Seeders' commitment to innovation is reflected in their ability to integrate cutting-edge academic research into practical defence technologies, making them an ideal partner for defence companies seeking expertise in communication, electronics, and unmanned systems, alongside strategic business support for technology-driven growth.

## PROFILE

SGL Engineering Ltd, is an Independent Services Organization that offers multidiscipline marine engineering services, operating in the Commercial Marine, Defence, Superyacht,

Cruise and Industry Sectors.

It was founded on 2008 by

- George S. Leloudas 35 years in Hellenic Shipyards of Skaramanga (Director of Weapon Systems, and MEKO Frigates program) and 8 years in Elefsis & Neorion Syros Shipyards
- Spyros G. Leloudas 13 years in Hellenic Shipyards of Skaramanga (Head of Mechanical Dpt. of Weapon & Electronic Systems) and 3 years in Elefsis & Neorion Syros Shipyards

After lengthy investigation for the absence of specialized companies in Precise Measurements in the Industry and in particular in Merchant and Naval Ships.

With its accumulative experience, the experienced personnel and its associates NASDIS & FEAC Engineering PC and our partner Relianeering AB is a Company specializing amongst others in 3D Inspection Metrology, Design, Finite Element Analysis, Condition-based Maintenance and Management.

In particular the services offered include:

3D Scanning, Inspection Measurements & Alignment - Verification Services for:

- Weapon Systems,
- Hull Deformation
- Hull Erection
- Shafting Systems
- Propulsion Systems
- Auxiliary Systems
- Steering Gear Systems
- Various Special Systems of DP Class Vessels

Vibration Survey Measurements, Condition Based Maintenance (CBM) & FEA (our Partner FEAC Engineering PC) for:

- Hull & Machinery
- Supervision - Coordination of the subcontractor Groups.

## ACTIVITIES & PRODUCTS

During our nearly forty years' experience in the defence sector, we had delivered our services to:

NAVAL - DEFENCE

- 3 Frigates Class Meko-200HN during New Building
- 6 Frigates Type Standard during Modernization Program
- 2 Submarines Type 209/1200 during NEPTUNE I Modernization Program
- 4 Submarines Class 214 during New Building
- 1 Submarine Type 209/1200 during NEPTUNE II Modernization Program
- 3 Submarines Type 209/1200 during Torpedo Tube Hostalane Guidelines Alignment
- 2 Gunboats Pirpolitis - Polemistis Class during New Building Greek Design
- 2 Gunboats OSPREY-55 Class during New Building
- 4 Gunboats MACHITIS Class during New Building

COMERCIAL - CRUISE SHIPS & SUPERYACHTS

- Average 15 - 20 vessels per year

LAND - CIVIL - GEODESY CONSTRUCTION

- Kallidromo Train Twin Tunnels 10km and Tempi Tunnels Gyroscopic Azimuth Measurements during their construction

INDUSTRY

- 3D Scanning of the entire ATAS Refinery in Mersin Turkey and producing 3D Solid State & 2D Drawings

PROFILE

SOTIRIA Technology is a Greece-based, deep-tech company developing underwater intelligence systems tailored to mission critical Defence and National Security applications.

SOTIRIA's solutions enable allied Navies, Industrial and Governmental partners to optimally protect critical offshore and seabed infrastructure by deploying beyond-acoustics, AI-empowered hardware and software.

ACTIVITIES & PRODUCTS

SOTIRIA Technology solutions:

- Nereid <sup>TM</sup> Underwater ISR system:  
The scalable, AI-powered underwater terrain protection solution for national maritime borders, national security assets and key maritime straits  
| <https://www.sotiria.tech/nereid>
- Dioptré <sup>TM</sup> AI powered software platform:  
Orient, understand, and make informed tactical decisions by fusing sensing data from multiple sensing sources

## PROFILE

Space Hellas is a leading Digital Integrator and Value-add Service Provider, with an international presence in the field of telecommunications, IT and security. The company has been at the center of technological developments since 1985, offering the market a wide range of integrated solutions and high-tech services supported by a state-of-the-art technical network.

Space Hellas designs, supplies, implements and supports integrated ICT and Security solutions for the financial, enterprise, public and defence sectors.

Space Hellas has 40 years of operations and sustainable Growth and is listed on the Athens Stock Exchange Market since 2000.

As an innovative company, it is a pioneer in new technological trends such as Cloud, Internet of Things, Smart Cities, Cybersecurity, Big Data, SD-WAN, Blockchain, AI, e.t.c.

Space Hellas has a wide range of solutions in Data Communications and Networking, Hybrid IT, Security Systems and Solutions, Physical Security, Infrastructure, UCC, Customer Experience-CX, Business Solutions and Mobility. The services provided by Space Hellas, also include Telecom Services, Cloud-based services, Managed Services, information security management system development services, personal data protection program development services in order to adapt to the requirements of GDPR and DPO Services.

Space Hellas Group has invested dynamically in providing specialized technology solutions in different technological sectors, such as Enterprise Software with SingularLogic, IoT with SenseOne, Intelligent Agriculture with AgroApps, as well as in Cybersecurity, Big Data Analytics and Web Intelligence with Web-IQ.

The company's headquarters are located in Athens, while it possesses branch offices in all major Greek cities and in Cyprus, subsidiaries in four foreign countries and activities extending from Europe up to the Middle East.

## ACTIVITIES & PRODUCTS

Applications development, Co-funded R&D projects.

Coordination and participation in EDIDP and EDF R&D projects (PANDORA, AINCEPTION, ACTING).

Applications development, Co-funded R&D projects.

Coordination of one (1) EDF project (AIception - AI Driven Cyberdefence) and participation in five (5) EDF Development and R&D projects (NewsRoom - Enhanced Cyber Awareness, EUCINF - Misinformation - Information Warfare Toolbox, ACTING - Cyberdefence Training and Exercises, FACTS - Federated Advanced Cyberphysical Test Ranges, 5GCombat - Military 5G and Cybersecurity).

Three new EDF projects under grant agreement preparation AIDA (AI Agents for Cyberdefence, ECYSAP EYE - European Cyber Situational Awareness Platform and LINGUARISE-DC Human Language Technologies - NLP).

Coordinator in One (1) EDIDP Project, successfully completed in 2022 in the area of Cybersecurity (PANDORA - EDR and Information Sharing)

PANDORA a Cyber Defence Platform for Real-time Threat Hunting, Incident Response and Information Sharing.

## PROFILE

SSA S.A. is a private company, mainly acting in the Hellenic market as a TURN-KEY contractor (developer and system integrator) or as a subcontractor of services and products in the field of specialized electronic applications for the Armed Forces, the Hellenic Aviation Service Provider (HASP) and other selected customers.

## ACTIVITIES & PRODUCTS

SSA S.A. has extensive experience and capabilities in the implementation of contracts as prime contractor or subcontractor for the delivery of Hardware, Software and Services in the field of specialized electronics applications.

SSA S.A. can undertake the responsibility for the provision to its principals of the following products and services:

- Electronic equipment / subsystem design and manufacture including hardware and software
- Identification, Procurement and Supply of the most suitable, project specific, equipment / modules / services available in the world market (hardware and software)
- System design, implementation and delivery of TURN-KEY solutions using Commercial Off-The-Shelf (COTS) or built-to-order equipment, including configuration management and logistics support
- Equipment installation services, including RADAR, satellite and wireless communications (RF) equipment
- Preparation of documentation, including detailed specifications (SSS/DFS), contracts, conformance statements, software and hardware configuration item lists, technical drawings, wiring lists, technical manuals, acceptance documents (FAT, STW, HAT/OAT/SAT) and user documentation
- Training services, including the preparation of training courses and materials, engineer and user training and certification
- Technical Assistance during equipment delivery and acceptance
- Technical support and warranty implementation, including maintenance and post-acceptance customer personnel training.

## PROFILE

SSMART S.A. is a state-of-the-art company, focused in specialised defence hardware production and services, primarily for naval applications and software production for real-time environments for the defence as well as the broader civilian markets.

## ACTIVITIES & PRODUCTS

SSMART's activities to date have been very much focused on Navy projects and specifically in the field of radar and electro-optical sensors, combat management systems and control and monitoring systems.

Our expertise is split into five main areas:

- Onsite / Onboard activities,
- Overhaul / Upgrade activities,
- ILS (Integrated Logistic Support) services
- Production of systems / units and
- Complete Software System Solutions.

Our scope however is always evolving and expanding.

## PROFILE

STELMA TSA, the parent company of STELMA Group of Companies, is a technical company that specializes in corrosion protection of surfaces. From 1990 to the present, it has completed a multitude of projects in its steadily upward course.

STELMA is, founded on the principles of responsibility, quality and operational excellence that are the cornerstones of its operations, has earned both the respect and the trust of its Clients and Associates. STELMA's President & CEO, Mr. Eleftherios Mamantzis from humble origins 33 years ago, founded the company on the principles of reliability, trust, quality and perfection of provided services. Nowadays, the company is highly extrovert with a total sales percentage of 70% coming from markets outside Greece.

STELMA has successfully completed painting works on behalf of Canadian Navy (HCMS Charlottetown, Souda Bay, Crete), USS Navy (Hershel "Woody" Williams", Astakos port), French Navy/ Naval Group (Frigate Guepratte, nuclear submarine Le Terrible in Brest, 3 France) while STELMA has a vast experience in painting the largest newly-built cruise vessels in the world on behalf of Celebrity Cruises, Royal Caribbean, MSC Cruises and many others from 2006 until today in Chantiers de l'Atlantique shipyard in Saint Nazaire, France.

Our company has recently signed a framework agreement until 2029 with CdA shipyard (JV with Naval Group) for painting the engine room & tanks in 2 + 2 option military vessels on behalf of French Navy. In Greece, STELMA has executed many projects of tank cleaning and paint restoration of fuel storage tanks in military premises of Hellenic Air Force.

Landmark project for STELMA is that of Eiffel Tower Painting in Paris in terms of the 19th Painting Campaign that took place from March 2009 until December 2010 with STELMA being the first non-French company to undertake this project since the inauguration of the Eiffel Tower back in 1887.

## PROFILE

We started in 1959 as a trading company. In the 80's we started the production of machines for the agricultural sector. Over the years we acquired extensive experience in manufacturing procedures and quality control.

Our philosophy is to invest in innovating technologies and constantly update quality control procedures in order to produce high quality parts and equipment.

Our factory consists of 15000m<sup>2</sup> closed space facilities. We created a separate division in our company (Sylco industrial) that produces parts or complete constructions for third parties and also started producing parts that can be/are used in the defence industry.

## ACTIVITIES & PRODUCTS

Our main production divisions are:

- Machine Shop Division
  - CHIRON 5-axis machining center 2000 mm x-axis
  - STAMA 5-axis machining center
  - DMG 4-axis Horizontal machining center
  - EUMA 4-axis machining center
  - Dugard 3-axis machining center
  - DMG Gildemeister 6-sides turning lathe (2 turrets - 2 spindles with live tooling)
  - Doosan 3-axis CNC lathe Plastic Injection mold design office
- Sheet Metal and Tube Division
  - BLM dedicated tube cutting lasers up to 210mm diameter
  - combo fiber laser cutting machine - Tube cutting up to 220 mm
  - Amada LC flat sheet laser cutting machine (unlimited sheet length)
  - Balliu flat sheet laser cutting machine
  - Amada Vipros King 368 Punching machine
  - Amada Press brakes up to 4meters/220ton
  - Finpower robotic Press brake
  - Crippa CNC tube bending machine 9 axis up to 80mm tube
  - Addison CNC tube bending machine
  - Pulzer CNC tube bending machine
- Welding Division
  - robotic welding cells for MIG/MAG (one of them consisting of 4 robotic arms)
  - robotic welding cell for TIGLaser welding Laser surface cleaning Certified welders for TIG and MIG/MAGSpot welding
- R&D division
  - Dedicated software 3D printers
  - Material Aging chambers
- Plastic Injection Molding division
  - plastic injection molding machines up to 2300cm<sup>3</sup>
- Assembly and Testing Division

## PROFILE

AVGIDIS AUTOMATION S.A. (TCB S.A.) established in 1992 in Athens. Since then we have managed to establish ourselves as a leading construction, automation, maintenance and service provider contractor in the Greek, Cypriot and Balkan areas.

Our scope of work extended and not limited to design, development, engineering, implementation, assembly, installation, testing, commissioning and maintenance of Industrial, Marine and Defence Automation Systems and Instrumentation Products, Project management and execution when in parallel we are managing sales and representation of above mentioned systems and products.

Our track record of successfully completed projects demonstrates our ability to complete projects on time and within budget while building long-term professional relationships with both our clients and suppliers.

Our team of experienced engineers and technicians and our over 30 years of experience and strong partnerships with leading manufacturers around the world acquired the necessary know-how to offer solutions that meet our customers' requirements.

PROFILE

TELETTEL is a private software and electronics design & development company based in Athens, Greece, committed to offering innovative solutions and setting industry standards while delivering a wide range of cost-effective products.

We were established in 1995 and we specialise in the leading edge areas of Space and Defence. Firmly established in a highly competitive global market, we are a recognised supplier of products and solutions to the international space and defence markets.

We work very closely with the European industry having provided micro-electronics / software solutions and products to AIRBUS DEFENCE & SPACE, THALES ALENIA SPACE, OHB, EUROPEAN SPACE AGENCY (ESA), CNES, THALES, MBDA, DASSAULT and many other customers.

TELETTEL is fully certified according to the ISO 9001:2015 Quality Standard. All key company personnel and facilities are also certified and authorised to handle graded material according to NATO C-M (2002) 49 Security System and 2013/488/EC Council Decision.

The company is registered in the Registry of Defence Material Manufacturers of the Hellenic Ministry of Defence for the activities of "Software Development for Defence systems" (Certificate No: 0051).

ACTIVITIES & PRODUCTS

Our main competence is the provision of system, software & hardware solutions for Defence and Aerospace systems. TELETTEL's engineering teams specialize in the design, development and testing of leading edge technology electronic systems and high reliability embedded software. TELETTEL provides:

- SW development services including on-board SW for avionics and space missions, ground software for aerospace and defence applications, real-time SW for Radar systems, Command & Control applications, network communication protocols and Simulation SW
- Electronics development services including FPGAs, RadHard design, VHDL coding, PCB design, behavioral testbenches for IP Core verification
- Test Benches (EGSE/SCOE) and Automated Test Equipment (ATE) for Instruments, mechanism drive electronics, Digital / Analogue / Hybrid electronic subsystems, interface boards
- The iSAFT product line for aerospace on-board data networks validation including SpaceWire, 1553, CAN, TTEthernet, SpaceFibre, WizardLink, other.

### PROFILE

TEMMA S.A. was founded in 1961 and has been specializing in the manufacturing and sub-assembling Precision Machine Parts and Mechanical Parts for General Industrial, Defence, Aviation and Aerospace use.

The continuous investment in state-of-the-art technology, new production systems and its excellent know-how has distinguished TEMMA as a leading force within the Greek industry and allow it to carry out the most demanding projects, in strict compliance with the international standards and norms.

Quality is integrated in the philosophy of TEMMA as a primary objective, as we believe in the achievement of continually satisfaction of our customers' ever-increasing requirements and the company has already been certified to DIN EN ISO 9001:2015 by TUV NORD.

Purpose: To be a leading force of the Greek industry by providing top quality products, enhanced services, reliability and mutually profitable co-operations.

Vision: To provide quality products that exceed the expectations of our valued customers within the Greek as well as the International Market.

Mission statement: To build long term relationship with our customers and provide exceptional products by pursuing business through innovation and advanced technology.

Goals: The company's goal has always been to satisfy the needs and requirements of its customers.

### ACTIVITIES & PRODUCTS

TEMMA's manufacturing is on request, with quantities and delivery dates that are agreed upon with the client. The company can also take up single-piece projects (prototypes), small and large batches. This flexibility is due to its machinery architecture (pallets, towers, etc) and the possibility of two extra shifts daily.

The list of prestigious and demanding projects assigned to TEMMA includes the manufacture of:

- The Torpedos SeaHake mod4,
- The ESSM and the IRIS-T MISSILES,
- The SUBSYSTEMS RADAR MIRAGE and RAFALE,
- The PATRIOT-ACTUATORS,
- The LEOPARD II-Components and many more.

## PROFILE

TERRA SPATIUM S.A. is a Greek SME with 30 years of focused experience and a wide range of capabilities in the fields of Geo-information. TERRA SPATIUM offers advanced solutions that expand in the whole range of Earth Observation for advanced markets and applications, creating added value for its customers through application specific processing, production and dissemination of all-source geospatial data.

Based on its proven capacity to provide dedicated imagery data and tailored Geo-information products, TERRA SPATIUM builds-up towards the establishment of spatial knowledge management systems and user oriented Geo-services.

TERRA SPATIUM provides structured consulting services, for markets and programs that require comprehensive geospatial advice, with emphasis on the geo-information management and application functionality aspects. This includes feasibility & requirements studies, as well as implementation and operation methodologies.

## ACTIVITIES & PRODUCTS

- Satellite Ground Station Administration  
In the context of the Greek participation into the Satellite Project HELIOS II, Terra Spatium has undertaken the onsite industrial support of the Greek Satellite Ground Station as the AIRBUS Defence and Space subcontractor, since 2010. The main duties consist of:
  - RF link and Antenna System maintenance,
  - Hardware and software administration,
  - Security Policy compliance &
  - Military Staff Training.
- SAR, Search & Rescue Informational System  
Terra Spatium S.A. successfully delivered a new Informational System for Search & Rescue Operations in Hellenic Coastguard. Θ | SAR platform is an in-house developed, modern system providing rapid and near to perfected predictions on the movement of drifting objects and missing persons at sea.
 

Features

  - Web based tool
  - Use of weather data that can accurately forecast and are meant to be integrated as automatic input for the software's algorithms.
  - Engage the closest vessels to an incident's optimal search plan area allowing to perform a reconnaissance routing.
- ACRITAS  
ACRITAS uses our Permeability Intelligence component which aims to locate the vulnerable areas of the border line, essentially taking into account the distribution of population, the ease of walking or driving, the facility to hide and of course the distance to ground surveillance infrastructure. Such analysis is done at different scales, according to the type of user. The vulnerable areas identified, help to choose the areas which have to be monitored or mapped at larger scale.

## PROFILE

Thales is a global organization focused on delivering innovative solutions that help civil and military customers make the right decisions at the right time and act accordingly.

With 81.000 employees in 68 countries, Thales plays a key role in keeping the public safe and secure, guarding vital infrastructure and protecting national security interests.

Thales has been active in Greece for 50 years, expanding its historical presence in Defence in the country to cover Air Traffic Control, Space and secured biometric documents markets.

Thales is a long-standing partner of the Hellenic Air Force, Hellenic Navy and Hellenic Army as well as the NATO. In civil markets, Thales has supplied much of the country's air traffic management systems.

## ACTIVITIES & PRODUCTS

- **ARMED FORCES**  
 Thales is a long-standing partner of the Hellenic Armed Forces.
  - On board of The Mirage and Rafale combat aircrafts in service with the Hellenic Air Force, equipped with Thales avionics systems. Thales has also supplied Crotale air defence systems and Erieye AEW&C communication system to the Air Force
  - In the Naval domain, surface vessels in service are equipped with Thales combat management systems, radars, EW and communication systems.
  - In the Land domain, Thales has provided PR4G tactical radios, surveillance radars and optronic systems to the Army.
  - Defence Service Center supports the Armed Forces with high-performance services
  - Provision of Cyber security services using Cyber Range Platform
- **AIR TRANSPORT SECTOR**  
 Thales has supplied numerous ATM systems to HCAA, including primary and secondary surveillance radars, communication and NAVAIDS systems.
- **DIGITAL IDENTITY & SECURITY**
  - Thales provides Identity & biometric solutions
  - Highly secure documents (passports & drivers' licenses)

## PROFILE

THEON SENSORS is a global market leader in night vision, thermal imaging and Electro-Optical ISR systems for military and security applications. With offices in Athens, Cyprus, Kempen, Arlington, Abu Dhabi, Dubai, Zug, Copenhagen and Singapore, coupled with manufacturing facilities in Athens, Wetzlar and Plymouth, THEON's commercial presence extends to 70 countries, of which 26 belong to NATO, with 180.000 systems manufactured and sold as of 2024.

All products are designed in house by an experienced team of engineers who are highly skilled experts in their fields, including optical, mechanical, electronic engineering, software engineering, computer vision engineering, AI engineering, as well as systems design.

As a result, THEON is able to adjust, develop and customize its products to specific customer requirements, which it considers a comparative advantage in the market. Emphasis is given on providing high performing and ergonomically advanced systems that increase the soldier's safety and mission success rate during night operations.

## PROFILE

TotalView was founded in 2011 and its core business is focused in integration of data, products and services related to space technology.

TotalView is the official certified partner for Greece and Cyprus of almost all satellite owners like MAXAR, Planet, Iceye, Capella Space, Umbra, Satellogic, European Space Imaging, SI Imaging Services, GHGSat, Spire, SatelliteVu, Axelspace, Synespective.

Utilizing high-end workstations, cloud infrastructure and COTS/Open-source software, combining decades of space and E.O. field experience and training (Operations and Productions certified), software development (Microsoft Certified), project management (PMI certified) and long-term multinational and local partnerships, TotalView can deliver a highly diversified and extensive range of space related products and services.

Although TotalView has implemented last years, large and important projects with a constantly evolving mix of solutions.

Defence and Intelligence sector is the second in volume, but the most important overall, with specific standards of management, security, responsiveness, execution accuracy and combination of products and services.

## ACTIVITIES & PRODUCTS

GEOINT products offered by TotalView, utilizes multisource very high resolution data (up to 15cm optical imagery, SAR, hyperspectral, night collections, thermal, meteorological, methane emissions) to deliver strategic advantage to Intelligence - Readiness - Operations sectors, with applications like Asset Monitoring (ports - airports - camps - constructions), Large Area Mapping, Digital Terrain Model (DEM-DTM) production (50cm resolution - 2m position accuracy) even in access-restricted areas, production and frequent update of Digital Surface Model (DSM) to create flight simulations of manned and unmanned vehicles or missiles, Building Footprints or 3D buildings extraction for training and planning of special operations, Line Of Sight applications, bespoke Intelligence applications.

Midstream activities include the installation and support of satellite ground stations for tasking and collecting data (6 antennas in 2 sites in Greece).

## PROFILE

UCANDRONE S.A., founded in 2013 and part of EFA GROUP since 2020, specializes in unmanned systems (UxS), offering a wide range of Airborne (UAS), Ground (UGS), and Surface (USS) solutions.

The company designs and produces Fixed/Rotary-wing aerial vehicles, including VTOL systems. Its team consists of Aeronautical, Mechanical, Electronic Engineers and GIS specialists with expertise in remote sensing, topography, and structural analysis for civilian, defence, and law enforcement markets.

UCANDRONE's core capabilities include the design and manufacture of unmanned vehicles, integration of payloads, software production (e.g., autopilots, AI), and advanced communication systems LTE/4G.

Additionally, it offers training, consulting, and participates in research programs with universities and institutions in Greece and abroad.

The company collaborates with Universities and Research Institutions, the EU and the Hellenic Ministry of National Defence, delivering innovative solutions and services to meet various operational needs.

## ACTIVITIES & PRODUCTS

### Activities & Services:

UCANDRONE was the first company in Greece, which develop applications based on Drones, offering significant benefits such as cost reduction, accuracy in information, security in transmission and recording of data, time savings and integration of different payloads.

Designs, Manufactures and Integrates Aerial Platforms, customized to the operational requirements of specific missions and applications, satisfying customers' diverse and specific requirements.

Offers innovative services and applications for aerial surveying, recording and analyzing data, based on the combined use of appropriate drone configuration, ground control systems and payloads, with emphasis on fully autonomous procedures.

### Product Portfolio:

As a result of its significant development experience, UCANDRONE has developed not only a set of Unmanned Aerial Vehicles (UAV) Platforms, Command & Control Equipment, but also Unmanned Ground Vehicles (UGV), Unmanned Surface Vehicle (USV), Training and Testing Products.

Through its experience, UCANDRONE can offer customized and cost-effective solutions, that can fully meet the most demanding, with minimal development effort, time and cost.

## PROFILE

Viking Life-Saving Equipment A/S boasts a robust presence in Greece, featuring a state-of-the-art production facility, service station, and training center. Our Greek subsidiary, Viking Life-Saving Equipment Hellas, employs over 65 dedicated professionals and stands as a premier manufacturer of high-quality boats for rescue, military, and law enforcement operations.

With nearly 50 years of industry experience, we have established ourselves as a trusted partner in the maritime and defence sectors, delivering innovative and reliable products that support critical defence missions. Our cutting-edge production facilities, located near Thiva, enable us to manufacture a diverse range of vessels, from high-speed interceptors to long-range patrol boats, tailored to meet the unique requirements of our clients.

We collaborate closely with our customers to ensure our boats are equipped with the latest technology and capabilities, including advanced communication systems, weapon systems, and radar equipment. Recognizing the vital role our vessels play in national security, we are committed to providing the most reliable and durable boats possible. Our vessels are built to withstand the harshest maritime environments, including extreme weather conditions and combat operations.

We work hand-in-hand with defence and law enforcement agencies to understand their unique requirements and develop tailor-made solutions. Our team of experts can modify boat designs, integrate advanced technology and communication systems, and provide comprehensive training and support to ensure seamless integration into our clients' operations.

As a responsible manufacturer, we prioritize environmental sustainability and adhere to strict environmental regulations in our manufacturing processes. We implement eco-friendly practices, including waste reduction, recycling, and responsible resource management, to minimize our environmental impact and contribute to a greener future.

## ACTIVITIES & PRODUCTS

### Activities

- Manufacturing: We produce a diverse range of boats, including high-speed interceptors, long-range patrol boats, multi-purpose workboats, rescue boats, and fast attack boats.
- Customization: We offer tailored solutions to meet specific client requirements, including modifications to boat designs and integration of advanced technology.
- Service and Support: We provide comprehensive maintenance, repairs, and spare parts services to ensure our products remain operational and reliable.
- Training: We offer training programs to ensure seamless integration of their boats into clients' operations.

### Products

- Patrol Boats: Including models like the Munin S1200, which are used by the Hellenic Coast Guard and Hellenic Army.
- Rescue Boats: Designed for various rescue operations.
- High-Speed Boats: Such as the Metis 750 RHIBs, equipped for rapid patrol and rescue missions.
- Specialized Boats: Including pilot boats, landing crafts, and passenger/personnel transport and ambulance boats.
- Lifeboats: Part of our broader range of life-saving equipment.
- Personal Protective Gear: Including firefighting equipment and safety training.

## PROFILE

A European SME, specialized in project management and operating as an integrator and sales vendor of technical solutions in the High Tech, Telecom, Defence & Security Sectors.

The company has shareholders named physical owners that are Greek citizens and operates from 2012 as a Société Anonyme.

Headquartered in Athens, the company has presence in Switzerland, Balkans, and the Middle East.

At Whitesteps Technologies, our mission is to design, deliver, and manage highly customized products and services for both private and public sector organizations. We work with B2B and B2G clients to achieve their unique business goals.

Our goal is to develop proprietary technology to meet the goals sales demand and satisfy our clients' requirements by selling and executing projects directly in these areas.

## ACTIVITIES & PRODUCTS

Whitesteps Technologies has a specialized security consulting and integration division dealing with complex technological projects.

As projects needs vary in a dynamic and rapidly changing new world, we build custom made solutions to fit our client needs.

### Products:

- In-Building Communications;
- Military gears;
- AI sound recording/transcription system;
- Hardware encrypted data storage devices;
- Smart Archive systems;
- Secure Data Transfer System.

## PROFILE

WINGS ICT Solutions is an SME that provides complete integrated, intelligent digital (software, hardware) solutions and transformation for different vertical business sectors;

- Environment (air quality, natural disasters),
- Utilities and Civil Infrastructure (energy/water/gas, transportation, construction),
- Production & Manufacturing (food, factories/logistics), and
- Service Sectors (health, education/culture, government, security/defence).

In order to achieve these results, WINGS exploits advanced technologies, such as Internet of Things (IoT), Artificial Intelligence (AI), Hyper Connectivity (4G, 5G, WiFi, Lora, etc.), Extended Reality and other advanced visualization techniques (AR / VR, mobile applications, etc.), Big Data and Clouds, aiming to provide extremely reliable solutions that help businesses improve their decision-making processes, expand their knowledge through detailed forecasting and predictive analytics and increase their efficiency focusing on customer satisfaction.

## ACTIVITIES & PRODUCTS

WINGS civil products use multiple types of devices incl. e.g., different types of cameras (underwater, on UxVs, thermal, etc.), UAVs / UUVs, Wearable devices (e.g., ECG, SpO2, blood pressure, etc.), Geolocation, etc.

They offer visual analytics / real-time image analysis for e.g., Human recognition in crowds for crowd management, Vehicle Recognition, and boat recognition at daylight and at night, as well as Digital Solutions for Health and Wellness, combining the use of UAVs, geolocation, health sensors and interactive maps.

These technologies are also applicable to land, sea and underwater surveillance as well as health support / monitoring of soldiers.

## PROFILE

303 Maintenance Depot was established in 1955 in Larisa,GR.  
Its main mission is rebuilding ground vehicles up to 5 ton., maintenance vehicles (trucks, busses, fire trucks e.t.c) and product batteries.

## ACTIVITIES & PRODUCTS

- Rebuilding Programs for ground vehicles up to 5 ton., such as STEYR trucks, M543 tractors and amphibious vehicles VBL.
- Rebuild main parts of the above vehicles.
- Maintenance armored security vehicle M1117.
- Product Batteries of 3 types 12Vx70Ah, 12Vx100Ah, 12Vx140Ah.
- Field maintenance by Mobile Repair Teams.
- Design and implementation of tools and spare parts.
- Rebuild M56 pack howitzer artillery.
- Maintenance of all types of vehicles over 5 ton. Except heavy-load trucks.
- Maintenance of all types of guns.
- Maintenance of all types of electrical generators.
- Steel constructions using conventional lathe and welding.

## PROFILE

The Quality Control Laboratory of Supplies Class III of 873 Fuel Depot is an army laboratory whose main mission is to provide its services to Hellenic Army units, regarding QC of ground and aviation petroleum products.

The Laboratory has the ability to accomplish a wide range of physicochemical petroleum product tests, such as 28 at fuels, 15 at lubricants and greases and 5 for engine coolants.

It is accredited by ISO/IEC 17025:2017 for 12 physicochemical tests on petroleum products, by the Hellenic Accreditation System (ESYD), Cert Nr 658.

## ACTIVITIES & PRODUCTS

- Providing services to Hellenic Army units, for Quality Control and Assurance of petroleum products.
- Determination of wear metals and contaminants in used lubricating oils or used hydraulic fluids, observation and prevention wear of ground and aviation equipment and machinery and mechanical components, such as engines and gearboxes.
- Participation in several proficiency tests organized by accredited national and international bodies with remarkable performance.
- Chemical Analysis job training to specialized privates, such as chemical engineers and chemical analysts.
- Collaborations with other Laboratories such as HAF Laboratories, Hellenic Army Laboratories and General Chemical State Laboratory.
- Consulting and providing information about petroleum products handling.

## PROFILE

HAFAD was originally established in 1925 in Paleo Faliro. After multiple changes and transformations, in 2014 it was lastly relocated to Elefsina Air Force Base as a complete aircraft, engine and special operational vehicles depot.

After almost 100 years it continues to provide all kind of aircraft- and vehicle-related services and support for Hellenic Air Force and other Services.

Our range of capabilities extends from aircraft, jet engines and vehicles depot level inspections/repairs to on-site repairs and field level support, combined with the relevant engineering, manufacturing and R&D activities.

Last but not least, HAFAD includes a chemical laboratory with diverse capabilities as well as a training facility for providing specialized technical courses

## PROFILE

The Hellenic Armed Forces Calibration Agency (HAFCA) was established in 1959. It is the highest echelon metrology and calibration laboratory in the Hellenic Armed Forces, ensuring that Armed Forces systems are accurate and can reliably perform their designated missions.

Its main mission is to provide calibration and repair services of Testing, Measurement and Diagnostic Equipment (TMDE) to the Hellenic Armed Forces, public and private sector entities, develop calibration procedure technical orders and measurement set-up and assess Precision Measurement Equipment Laboratories (PMELs) for certification.

HAFCA is equipped with high precision equipment calibration devices and reference standards. All functions are performed by highly skilled personnel in laboratories with rigid environmental controls necessary for precise measurements.

HAFCA is accredited by the Hellenic Accreditation System (E.SY.D.) in accordance with ISO/IEC 17025:2017 for delivering calibration services in the fields of electrical resistance, mass, temperature and length, according to certificate No.966-4 Annex F2/6.

Its laboratory reference standards are traceable to the International System of Units (SI) through Hellenic, European and/or US National standards and its reliability is strengthened by successfully participating in laboratory comparison projects organized by Hellenic Institute of Metrology.

## ACTIVITIES & PRODUCTS

HAFCA performs calibration on the following fields:

- Low Frequency (multimeters digital & analog, calibrators, resistances, DC loads, capacitors, inductors, phase meters, high voltage standards & probes, power meters, etc).
- Microwave Devices (power meters, spectrum analyzer, power sensor, RF comms test set, audio analyzer, directional coupler, attenuators, etc)
- Generators - Analyzers (Signal, synthesized function, arbitrary waveform, pulse, oscilloscopes calibrators, distortion analyzers, modulators, etc).
- Oscilloscopes
- Time - Frequency counters
- IFF - ATC - Navigation systems.
- Dimensional (gauge blocks, autocollimator, micrometers, roundness, theodolite, bore gauges, clinometers, flatness, etc).
- Temperature (resistance thermometer, thermocouples, temperature - humidity data logger, infrared thermometer, liquid in glass thermometers, etc)
- Mass measurement (mass standards, balances)
- Force (load cells, dynamometers, tensionmeters, aircraft balances)
- Pressure (capacitance manometer, pitot & static test sets, pressure gauges, vacuum gauges)
- Torque (torque converters, torque multipliers, torque meters)
- Flow (Liquid Flow Meters, Gas Flow Meters)

## PROFILE

Depot's mission is to perform depot level inspections, repairs and modifications of ground transportation vehicles, Ground Support Equipment (GSE), manufacture of components - systems for HAF end items and to provide joint technical support to the Hellenic Armed Forces and to third parties.

In this context, maintenance (inspections, repairs and overhauls) is carried out to vehicles and engines, aircraft ground support equipment and components, air defence fire arms, and pilot life support equipment (PLSE). Surface and heat treatments on special materials and parts are carried out and there is additional capability to design, manufacture and implement new parts, assemblies and engineering solutions to conduct it's mission.

## ACTIVITIES & PRODUCTS

Depot Level Maintenance

- Maintenance and repair procedures
  - General Purpose Vehicles and piston engines
  - Anti aircraft guns - Defence fire arms
  - Pilot life support equipment
  - Surface and heat treatments (Cr, Cd, Zn, Black oxide plating)
  - GSE (Nitrogen Servicing Units, Jack Hydraulic, Generator Set Gas Turbine)
  - General purpose hydraulic and pneumatic devices
  - Electric Motors, Generators
  - Aircraft covers, plugs and protective gear
  - Sandblasting and Painting (Vehicles and Special purpose Aircraft Radar Absorbing material)
  - Extended Areas Radar Absorbing material Painting Repair (e.g. Air Duct F-16)
- Design and manufacture
  - GSE
  - Aircraft/Vehicle maintenance stands and accessories
  - Vehicle and GSE modifications and upgrades
- Various LRUs & Equipment
  - Mobile Units Providing Repair And Maintenance Services (e.g. Electric Motors and Defence fire arms On Site repair Team)
  - UAV piston engine Maintenance (Pegasus II)
  - Electrical Accessories (e.g. Ground Power Unit (GPU-2) C-130)
  - Compressed Air Bottles (e.g. Oxygen, Nitrogen, Breathing Air, up to 3.000psi).

# HAFTEC

"Wisdom in Engineering"

## ID

Name: HAFTEC  
Hellenic Air Force Telecommunications & Electronics Depot  
Founded: 1946  
Location: ATTICA, GR  
Web: [www.haf.gr](http://www.haf.gr)  
Member: \* HMoD Factory Unit

*\*See List of Abbreviations & Acronyms, page 240*

## Size

Turnover: ~24.930.000 €  
Employees: 181  
Facilities (m<sup>2</sup>): ~6.800

## Contact

Telephone: +30 2108934001  
E-mail: [ethm@haf.gr](mailto:ethm@haf.gr)  
Address: Terma Mikras Asias, P.C. 16562, Glyfada, Attica, Greece

## Customers

HELLENIC AIR FORCE  
HELLENIC ARMY  
HELLENIC NAVY  
HELLENIC COAST GUARD  
HELLENIC NATIONAL METEOROLOGY SERVICE  
HELLENIC CIVIL AVIATION AUTHORITY  
NATO SUPPORT AGENCY (NSPA)

## Quality

HAF REGULATION - QUALITY POLICY C-3 / JUL 2017  
HAF GENERAL STAFF SUCCESSFUL AUDIT MAR 2022  
HAF SUPPORT COMMAND SUCCESSFUL AUDIT JUN 2024

## ACTIVITY

Sector:	Capability:	Level:
<b>Main</b> Electronics, Communication & IT Systems/Services, Cyber Defence, AI/Machine Learning	Test & Evaluation, Conception/Development, Support & Services, Assembly/Integration/Validation	Subsystems or equipment, Components, Services
<b>2nd</b> Engineering, Modeling and Simulation, Consulting, Training	Test & Evaluation, Conception/Development, Support & Services, Assembly/Integration/Validation	Subsystems or equipment, Components, Services
<b>3rd</b> Labs & Calibration	Test & Evaluation, Conception/Development, Support & Services, Assembly/Integration/Validation	Services

## PROFILE

The Hellenic Air Force Telecommunication and Electronics Depot (HAFTEC) was initially established in 1946 as the Wireless Telecommunications Workshop as part of the 202 State Aircraft Factory at the Faliro Air Base. In the 1980's, following relocation and merging with the HAF Research & Technology Center, it was established as an independent unit under its current name.

It's core mission includes depot level maintenance and repair of the HAF avionics and electronic systems both in house and on site as well as engineering services concerning modification, certification and development of aircraft and ground based weapon systems.

HAFTEC participates with partner companies and universities in R&D programs and academic studies.

## ACTIVITIES & PRODUCTS

### PRODUCTION ACTIVITIES

- Electronic Systems Repair & Maintenance: Telecommunication, Ground Based Air Defence, Electronic Warfare, Surveillance, Radar and Navigation Systems.
- Electronic Parts and Cables Manufacturing: Solid State IFF, Cameras, Radios over IP, CRYPTO devices and Aircraft Systems Cabling Various LRUs & Equipment.

### ENGINEERING ACTIVITIES

- Non-ionizing Electromagnetic Radiation Measurements
- Wind Farms on RADAR Systems Impact Assessment
- Electromagnetic Interference / Compatibility / Vulnerability (EMI / EMC / EMV) Assessment and Evaluation
- Wireless Microwave Links Design & Installation
- Network-based Systems' Control Research & Development
- RF / RADAR Coverage Diagrams
- Aircraft and Engines Structural Integrity Programs

### APPLIED RESEARCH ACTIVITIES

- Laboratory Testing of Materials (Mechanical Properties, Materials Composition and Identification)
- Accident Investigation (Materials Failure Laboratory Analysis)
- Aircraft External Stores Certification
- Aircraft and Weapon Systems Modifications - Improvements
- Aircraft Systems and Parts Design - Prototyping

# ABBREVIATIONS & ACRONYMS

RMDM | Registry of Manufacturers of Defence Material

ACCI (EBEA)	Athens Chamber of Commerce and Industry
AHCCD	Arab-Hellenic Chamber of Commerce & Development
AMCHAM	American-Hellenic Chamber of Commerce
AoP	Air and Ocean Partners
CCIF	Canadian Collision Industry Forum
CCIFG	Chamber of Commerce and Industry French - Greek
DGIHK	Deutsch-Griechische Industrie und Handelskammer
